QUESTION 1

What is one way to determine if administrative security for IBM WebSphere Application Server is disabled when logging into the Integrated Solutions Console?

- A. A user is not forced to use HTTPS (SSL).
- B. An administrator is allowed to type any random password.
- C. An administrator is prompted for user name, but not password.
- D. When the username wasadmin is used to log in, the password used is the default "password".

Correct Answer: C

Congratulations! You have successfully manually disabled Global Security for your IBM WebSphere Application Server instance. You should now be able to access the WAS Integrated Solutions Console (ISC) without having to specify a password.

QUESTION 2

Which of the following is a requirement when performing a silent install?

- A. A response file must be used.
- B. Artifacts must be saved for performing a roll back.
- C. The repositories must be defined before starting the install.
- D. The repositories must be downloaded before performing the install.

Correct Answer: A

QUESTION 3

Which of the following can be queried to get PMI data?

- A. Server Cell
- B. JMX Connectors
- C. MBean ObjectNames
- D. Application ServerNames

Correct Answer: C

PMI data can be gathered from the J2EE managed object MBeans or the WebSphere Application Server PMI Perf MBean.

QUESTION 4

When server1 is running profile1, in which folder would the application logs be found?

- A. \profiles\server1\logs
- B. \profiles\profile1\logs
- C. \profiles\profile1\logs\server1
- D. \profiles\server1\logs\profile1

Correct Answer: D

QUESTION 5

Through what protocol can a Java client directly access EJBs running on an application server?

- A. JDBC
- B. RMI/IIOP
- C. SOAP/JMS
- D. SOAP/HTTP

Correct Answer: D

Provided that it uses the correct protocols (SOAP, HTTP, WSDL), any web service client can access a stateless session bean, whether or not the client is written in the Java programming language. The client doesn't even "know" what technology implements the service: stateless session bean, JAX-WS, or some other technology. In addition, enterprise beans and web components can be clients of web services. This flexibility enables you to integrate Java EE applications with web services.
