QUESTION 1

Which two statements are true about the Team Artifacts view in the Eclipse client? (Choose two.)

- A. The view provides centralized access to team-related information and the artifacts that the viewer's team is working on.
- B. The view can be configured to only show artifacts associated with teams that the viewer is interested in.
- C. The view provides quick information about the project status and can be customized using widgets.
- D. The view tracks the repository workspaces that are in the viewer's current sandbox, and manages the viewer's change sets.
- E. The view displays the number of work items by tag attribute for a given query.

Correct Answer: AB

QUESTION 2

A customer expects a work item with an appropriate "Planned for" attribute to show on a team's iteration plan, but the work item is missing from the plan view. What is the most likely reason?

- A. The work item's owner is unassigned.
- B. The work item's owner is not part of the team owning the plan.
- C. The work item's Filed Against category is not associated to the team owning the plan.
- D. The work item's due date is set to a date after the iteration's end date.

Correct Answer: C

QUESTION 3

What is the main purpose of the work item discussion section?

- A. to add notes and exchange information about the work item
- B. to assign the owner of the work item
- C. to move the work item through its lifecycle to the resolved state
- D. to associate a work item with a release

Correct Answer: A

QUESTION 4

Which statement best describes Rational Team Concert?

- A. It is part of the Rational solution for Collaborative Lifecycle Management and provides the quality management capabilities.
- B. It extends the Rational solution for Collaborative Lifecycle Management with design management capabilities.
- C. It is part of the Rational solution for Collaborative Lifecycle Management and provides change and configuration management capabilities.
- D. It extends the Rational solution for Collaborative Lifecycle Management with asset management and governance capabilities.

Correct Answer: C

QUESTION 5

What is a Change Set?

- A. An representation of the configuration of a component at any particular point in time
- B. An element that specifies the flow between a repository workspace and its targets
- C. A time stamp that is automatically added to a modified resource within a component
- D. A repository object that collects a related group of modifications to files within a component

Correct Answer: D
