QUESTION 1

A solution developer has created the following message flow:

The integration requirements state that the name for the output file needs to be computed from the message payload.

How can the developer implement this requirement in the Mapping node?

- A. Use a custom Java transformation to call the IBM Integration Java API to set the file name.
- B. Use a custom ESQL transformation to change the value of the promoted file name property from the FileOutput node.
- C. Configure the headers and folders for the output message to include the Environment tree and map the filename for the output message in the Environment tree.
- D. Configure the headers and folders for the output message to include the local Environment tree and map the filename for the output message in the local Environment tree.

Correct Answer: A

QUESTION 2

A solution developer is asked by a deployment team about options to deploy BAR files that provide just deployment capabilities.

Which option provides only deployment capabilities, and does not provide packaging capabilities?

- A. Commands on AIX
- B. Commands on Windows and Linux
- C. IBM Integration web user interface
- D. Integration API and IBM Integration Explorer

Correct Answer: C

QUESTION 3

A solution developer installed the IBM Integration Bus runtime and the Integration Toolkit using the "Developer Edition" on a Windows 64 bit environment.

Which integration server functionality is available for the developer?

- A. All features are available with unlimited integration servers.

- B. All features are available but there is a limitation of creating only one integration server.
- C. A limited set of nodes is available with unlimited integration servers.
- D. A limited set of nodes is available and there is a limitation of creating only one integration server.

Correct Answer: C

QUESTION 4

A solution developer wants to monitor how much Java processing memory is currently allocated to an integration server. A flow is currently deployed.

Assuming resource statistics collection has been started, which step will allow the developer to obtain these statistics?

- A. Expand Integration Nodes folder in IBM Integration Explorer Choose Window menu: Show view: Resource statistics Click JVM tab, and view CommittedMemoryInMB measurement
- B. Expand Integration Nodes folder in IBM Integration Explorer Choose Window menu: Show view: Resource statistics Click JVM tab, and view UsedMemoryinMB measurement
- C. Expand Integration Nodes in IBM Integration Toolkit Choose Window menu: Show view: Resource statistics Click JVM tab, and view UsedMemoryinMB measurement
- D. Expand Integration Nodes in IBM Integration Toolkit Choose Window menu: Show view: Resource statistics Click JVM tab, and view CumulativeGCTimeInSeconds measurement

Correct Answer: B

QUESTION 5

A solution developer needs to create or reconfigure the security identity to connect to a Websphere eXtreme Scale secure grid.

Which command should the developer use to accomplish this task?

- A. mqsisetdbparms
- B. mqsisetsecurity
- C. mqsimanagexalinks
- D. mqsicreateconfigurable-service

Correct Answer: B
