### QUESTION 1

A BPM Application developer needs to construct an integration service that will access an external web service. The web service has been predefined in the process application settings. The BPM application developer creates a new integration

service and adds a web service integration to the canvas. Since this is a predefined web service, on the implementation tab, the BPM application developer selects "From process application settings" for the discovery scheme.

What should be the next step in configuring the web service connector using the predefined server for the BPM application developer?

- A. Insert the URL and use the "Discover" button.
- B. Fill in the data mapping tab in the web service properties.
- C. Select the defined web service and select which operation to use.
- D. Generate the data types that will be inputs and outputs for the web service.

Correct Answer: C

---

### QUESTION 2

Which characteristic does an unstructured adhoc activity have? An unstructured adhoc activity:

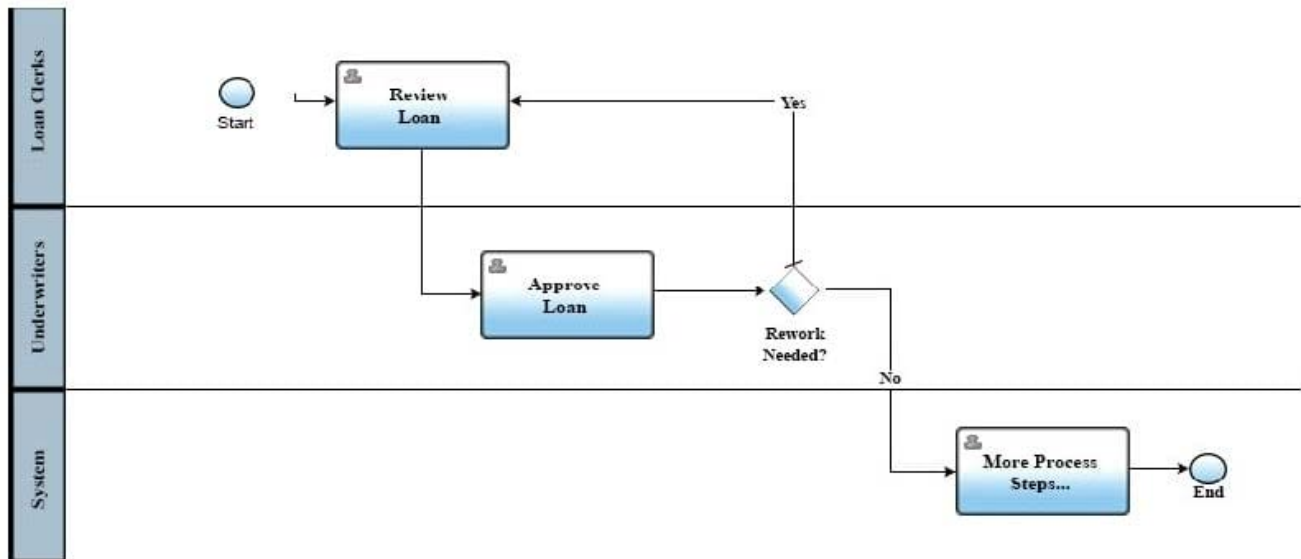

- A. cannot be hidden
- B. must be non-repeatable
- C. must be started by a user
- D. has no input and output flows

Correct Answer: D

---

### QUESTION 3

A bank is implementing a new loan request process as shown in the following Business Process Definition (BPD):

The bank has analyzed the process and determined that rework happens 80% of the time. Interviews of the loan clerks who perform the review loan step show that the work to review the loan is complicated, and that help from more

experienced clerks would benefit the less experienced clerks and reduce the amount of rework required. The bank has done some research to identify the list of their most experienced loan clerks and requires the less experienced loan clerks

to use the collaboration feature to get help from the more experienced clerks that are available.

What actions should the BPM application developer take to meet this requirement?

- A. Use a team filter service to add the list of experienced users to the Loan Clerks team.
- B. Use a team retrieval service to add the list of experienced users to the Loan Clerks team.
- C. Add the list of experienced clerks to a new team and assign the new team as an expert team on the Review Loan task.
- D. Add the list of experienced clerks to a new team and assign the new team as a managers team of the Loans Clerks team.

Correct Answer: B

#### QUESTION 4

An existing Case Type implementation is initiated either by adding documents of a specific document type to the BPM document management environment or manually by knowledge workers. Now, the case type needs to be enhanced, to initiate case instances programmatically.

How does the BPM application developer provide the capability?

- A. Drag the case type onto a swim lane
- B. Drag the case integration service onto a swim lane
- C. Use a JavaScript API function in a Script

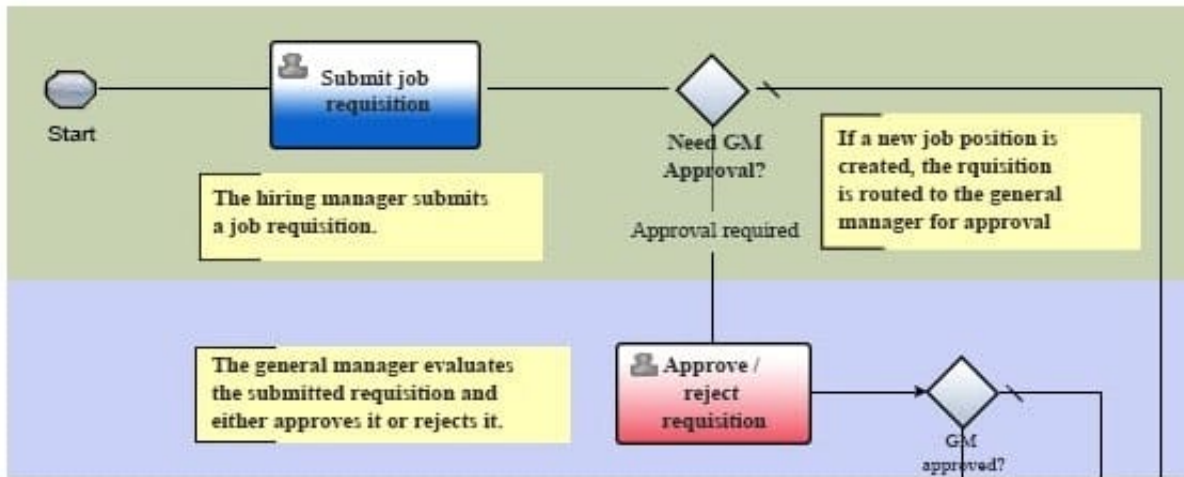

D. use a REST API for case in a REST call

Correct Answer: A

### QUESTION 5

A new business process application is being created with several business process definitions (BPD). One of them is shown in the exhibit:

The following requirement should be met:

The first user task should be assigned automatically to the user who starts this top level BPD. A BPM application developer is creating a new business process application that is required to have no deprecated features.

How should the BPM application developer configure the assignment for this user task?

- A. Select Last User in the User Distribution field
- B. Select Last User in Lane in the Assign to field
- C. Select Last User in the User Distribution field and Last User in Lane in the Assign to field
- D. Select Custom in the Assign to field and write `tw.system.step.user` into the Expression field

Correct Answer: D
