QUESTION 1

What is the most granular level of the methodology you can view in the SAP Roadmap Viewer?

A. Phase

B. Workstream

C. Task

D. Deliverable

Correct Answer: C

C is correct because task is the most granular level of the methodology that you can view in the SAP Roadmap Viewer. A task is a specific activity that needs to be performed by a role within a deliverable. A task has a description, an effort

estimation, and a list of accelerators that support its execution.

QUESTION 2

How do you set up Scrum teams?Note: There are 2 correct answers to this question.

A. Based on end-to-end processes like order-to-cash

B. By type of work, like configuration Scrum, documentation Scrum, and testing Scrum

C. As a cross-functional team covering multiple functions, like configuration, data loads, and v u testing

D. Based on group size, but a minimum of 12 people

Correct Answer: AC

A is correct because based on end-to-end processes like order-to-cash is one of the ways to set up Scrum teams. This way, the Scrum teams are organized around the business value streams that they support, and they have a clear

understanding of the customer needs and expectations. This also helps to reduce dependencies and handovers between teams, and to optimize the flow of work.

C is correct because as a cross-functional team covering multiple functions, like configuration, data loads, and testing is one of the ways to set up Scrum teams. This way, the Scrum teams have all the skills and competencies that they need

to deliver a complete and working product increment in each Sprint. This also helps to increase collaboration and communication within the team, and to foster a sense of ownership and accountability.

QUESTION 3

Which task should you include in your procedure while preparing for a fit-to-standard analysis in an SAP Data Warehouse Cloud project?Note: There are 2 correct answers to this question.

A. Review SAP S/4HANA best practices availability for your country.

B. Review all the necessary Implementation Design Principles (IDPs).

C. Review available SAP S/4HANA accelerators for the Data Management workstream

D. Review all the necessary leading practice process diagrams.

Correct Answer: BD

B is correct because Implementation Design Principles (IDPs) are documents that provide guidance on how to configure and extend SAP Data Warehouse Cloud to meet customer-specific requirements.

D is correct because leading practice process diagrams are graphical representations of the business processes that are supported by SAP Data Warehouse Cloud and can be used as a reference for the fit-to-standard analysis.

QUESTION 4

What can you find in the SAP Fiori apps reference library? Note: There are 3 correct answers to this question.

A. Shortcut to the Quicksizer tool to estimate hardware requirements

B. Installation and configuration requirements for selected apps

C. Related app-specific SAP Fiori design guidelines

D. Shortcut to the Maintenance Planner tool to establish the technical update path

E. Related app recommendations based on your usage profile

Correct Answer: BCE

B is correct because installation and configuration requirements for selected apps are one of the things that you can find in the SAP Fiori apps reference library. The SAP Fiori apps reference library provides information on how to install and

configure each app, such as required software components, backend configuration steps, and frontend configuration steps.

C is correct because related app-specific SAP Fiori design guidelines are one of the things that you can find in the SAP Fiori apps reference library. The SAP Fiori apps reference library provides links to the app-specific design guidelines that

describe the user interface and interaction patterns of each app, such as layout, navigation, controls, and dialogs.

E is correct because related app recommendations based on your usage profile are one of the things that you can find in the SAP Fiori apps reference library. The SAP Fiori apps reference library provides suggestions on other apps that

might be relevant or useful for you based on your role, industry, or business area.

QUESTION 5

What tool would you use for managing project tasks and Solution Documentation when implementing SAP S/4HANA Cloud, public edition?

A. SAP Support Portal

B. SAP Roadmap Viewer

C. SAP Transformation Navigator

D. SAP Cloud ALM

Correct Answer: D

D is correct because SAP Cloud ALM is a tool that can be used for managing project tasks and solution documentation when implementing SAP S/4HANA Cloud, public edition. It provides features such as project task management, solution documentation, change request management, and test management. Verified References:SAP Cloud ALM
