QUESTION 1

Why does SAP recommend to synchronize SAP ERP customizing settings (reference data) between the SAP Master Data Governance (MDG) system and the target system(s)?

There are 2 correct answers to this question

A. If reference data only exists in the SAP MDG system, this reference data CANNOT be chosen within the SAP MDG change request processing

B. If reference data only exists in the SAP MDG system, the replication to the target system(s) can fail

C. If reference data only exists in the target system, this reference data CANNOT be chosen within the SAP MDG change request processing

D. If reference data only exists in the target system, the corresponding attributes are automatically removed from the governance scope

Correct Answer: AD

QUESTION 2

What are the major enhancements in generic search?

A. The data model and entity type can be selected directly (this can also be preset by customizing or configuration).

B. For edition-based data, validity time can be used as search criteria, and is displayed in the result list.

C. The result list is more versatile. For example, you can filter by value, or personalize it.

D. FPM-based customizing and configuration are available.

E. Their visibility depends on customizing and selected entity type.

Correct Answer: ABCD

QUESTION 3

Your customer needs different processors for material master data depending on the material group. Which options do you have?

A. Use a separate change request type per material group and use a context-based adaptation (CBA) to control the user determination depending on the chosen material group and the current processor.

B. Use a separate change request type per material group and implement validation checks, that only the dedicated material groups can be maintained in each change request type.

C. Use the same change request type and control the material group maintenance via authorizations and dynamic user agent determination.

D. Use the same change request type and use a custom feeder class to control the Material Group field in the user

interface depending on the processor\\'s authorizations.

Correct Answer: A

QUESTION 4

In which domain is the rule-based workflow set as default? Choose the correct answer.

A. Supplier/Customer

B. Custom Objects

C. Material

D. Financials

Correct Answer: C

QUESTION 5

What are the benefits of new UI components for search and single-object processing?

A. Uniform UI experience across all MDG domains

B. Multiple personalization features

C. Customizing and configuration using FPM features

D. None of the above.

Correct Answer: ABC
