QUESTION 1

As the figure, Information Steward, illustrates, in addition to building a solid data foundation for reporting, the Data Services platform also provides a framework for ongoing governance of enterprise information assets. The EIM 4.0 release includes a new interface for the business user - Information Steward. Once the data has been integrated and analyzed, Info Steward allows the data steward to easily share metrics with executives, and to monitor Key Performance Indicators, including what that are shown in the figure:

A. A scorecard that measures data quality

B. Duplication detection is based on SAP HANA.

C. Quality KPIs and associated metrics

D. The quality trend over time

Correct Answer: ACD

QUESTION 2

What is different when you use SAP HANA as database for SAP Master Data Governance (MDG)?

There are 2 correct answers to this question.

A. Data replication to SAP S/4HANA-based systems is only available when you run SAP MDG on SAP HANA.

B. Some SAP MDG capabilities like Smart Business are only available when you run SAP MDG on SAP HANA.

C. Virtual data models in SAP MDG are only supported with SAP HANA.

D. Enterprise Search/TREX is NO longer mandatory if you run SAP MDG for material on SAP HANA.

Correct Answer: BD

QUESTION 3

Where can you monitor data replicate on? There are 2 correct answers to this question.

A. Application log

B. SAP Master Data Governance analytics

C. Search result list

D. Dedicated DRFLOG transaction

Correct Answer: AD

QUESTION 4

What are the elements of a complete UI configuration?

A. One FPM application configuration for USMD_OVP_GEN, which can include one FPM adaptable OVP configuration for CBA

B. Supports integration scenarios based on a Service Oriented Architecture (SOA) especially used WEB-Services,

C. Integrates into existing integration technologies e.g. Application Link Enabling (ALE) especially Intermediated Documents (IDoc).

D. Allows for an easy "growth path" from existing technology to SOA because it wraps the different communication channels

Correct Answer: A

QUESTION 5

How do you configure customer-specific processes with parallel branches, step-specific user interfaces, and dynamic step management?

There are 2 correct answers to this question.

A. Use the rule-based workflow and standard workflow in parallel for the same change request type.

B. Create separate business activities and assign them to the relevant change request types.

C. Set up the flex mode to configure the parallel workflow branches.

D. Assign different Uls to each individual change request step.

Correct Answer: AC
