### QUESTION 1

In the case of missing OData authorizations, why is it not recommended to maintain S\_SERVICE manually within an SAP Fiori authorization role? (Choose two.)

- A. Both front-end and back-end entries are generating the same S\_SERVICE authorization object with different authorization values.
- B. Both front-end and back-end entries are generating the same S\_SERVICE authorization object with the same authorization values.
- C. The SRV\_NAME value of the S\_SERVICE authorization object is the name of an OData service.
- D. The SRV\_NAME value of the S\_SERVICE authorization object is the hash value of an OData service.

Correct Answer: AD

---

### QUESTION 2

Your system is configured to prohibit a user from logging on multiple times to the system with the same User ID in violation of your SAP licensing agreement. However, certain users need to be exempt from this limitation. Which instance profile parameter can you configure to allow a small group of users to bypass the limitation of multiple logins?

- A. login/server\_logon\_restriction
- B. login/multi\_login\_users
- C. login/disable\_multi\_gui\_login
- D. login/disable\_multi\_rfc\_login

Correct Answer: B

---

### QUESTION 3

If the OData back-end service is located on a remote back-end, users need which authorization objects to perform the RFC call on the back-end system? (Choose two.)

- A. S\_RFC
- B. S\_RFACL
- C. S\_START
- D. S\_SERVICE

Correct Answer: AB

---

### QUESTION 4

Which of the following actions correctly describes the usage of Back Channel Single Sign-On based on (SAML) 2.0?

- A. The service provider redirects the user to an identity provider and includes a SAML artifact referring to the authentication request.
- B. The service provider gets the authentication request from the identity provider over a SOAP channel.
- C. The service provider queries the user for authentication credentials.
- D. The identity provider gets the authentication response from the service provider over a SOAP channel.

Correct Answer: A

---

#### QUESTION 5

What is the main purpose of SAP Access Control, as an enterprise software solution?

- A. Identify security risk and document compliance
- B. Deployment of encryption services
- C. Secure authentication for cloud and on-premise
- D. Manage corporate social media presence

Correct Answer: A
