QUESTION 1

Which types of dialog instances can be installed to an SAP system, depending on the SAP system type? Choose the correct answer(s).

- A. AS ABAP dialog instance
- B. Central services dialog instance
- C. AS Java dialog instance

Correct Answer: AC

QUESTION 2

Runtime Error - Description of Exception

Category: ABAP Programming Error
 Runtime Errors: TIME_OUT
 ABAP Program: ISEPOR12
 Application Component: Not Assigned
 Date and Time: 01.12.2011 09:55:38

Short text
Time limit exceeded.

What happened?
The program "ISEPOR12" has exceeded the maximum permitted runtime without interruption and has therefore been terminated.

Error analysis
After a specific time, the program is terminated to make the work area available to other users who may be waiting. This is to prevent a work area being blocked unnecessarily long by, for example:
 - Endless loops (DO, WHILE, ...),
 - Database accesses with a large result set
 - Database accesses without a suitable index (full table scan)

The maximum runtime of a program is limited by the system profile parameter "rdisp/max_wprun_time". The current setting is 300 seconds. If this time limit is exceeded, the system attempts to cancel any running SQL statement or signals the ABAP processor to stop the running program. Then the system waits another 60 seconds maximum. If the program is then still active, the work process is restarted.

System Log: Local Analysis of twdf1903

Date: 01.12.2011

Time	Type	Hr	Clk	User	TCode	Priority	Grp	W	Text
09:55:38	DIA	000	100	CATON	SE38	●	AB	0	Run-time error "TIME_OUT" occurred
09:55:38	DIA	000	100	CATON	SE38	○	AB	1	> Short dump "111201 095538 twdf1903_DEV_00 " generated

There are 2 correct answers to this question.

- A. The error can be avoided by running the respective program in a batch job in the SAP system, if background processing is possible for this program.
- B. The error was caused by a transaction in the SAP system that exceeded the extended memory
- C. The error can be avoided by reducing the memory usage of the respective transaction in the SAP system.
- D. The error was caused by a transaction that exceeded the maximum runtime in a dialog work process of the SAP system.
- E. The error was caused by a transaction that exceeded the maximum runtime in a background work process of the SAP system.

Correct Answer: AD

QUESTION 3

How can you determine the current store location for TemSe spool objects?

- A. Check the table space PSAPSPOOL in the database.
- B. Check the environment variable DIR_SAPSPPOOL
- C. Check the value of the system parameter rspo/store_location.
- D. Check the value of the SAP Spooler Vault parameter.

Correct Answer: C

QUESTION 4

When performing modification adjustments for the ABAP Dictionary, using transaction SPDD (Modification Adjustment Dictionary) during an SAP System upgrade of the development system, which of the following statements are true?

There are 2 correct answers to this question.

- A. Objects which may need to be adjusted in transaction SPDD (Modification Adjustment Dictionary) are, for example, domains, data elements, and table definitions.
- B. Objects which may need to be adjusted in SPDD (Modification Adjustment Dictionary) are, for example, views and reports.
- C. Modification adjustments with transaction SPDD (Modification Adjustment Dictionary) are performed during the upgrade, to avoid data loss when customers have changed the standard ABAP Dictionary objects.
- D. Dictionary) are performed during the upgrade, to avoid data loss when customers have changed the standard ABAP Dictionary objects.
- E. Customer-developed reports in the customer name range are adjusted with transaction SPDD during the upgrade.
- F. Modification adjustments for the ABAP Dictionary are performed after the upgrade.

Correct Answer: AC

QUESTION 5

Which of the following are features of SAP Identity Management (IdM)? Choose the correct answer(s).

- A. Integration of the different databases of SAP and non-SAP systems
- B. Compatible with integrated SAP NetWeaver security frameworks
- C. Performs as a Lightweight Directory Access Protocol (LDAP) connector

D. Integration with SAP NetWeaver platform and business applications

Correct Answer: BD
