QUESTION 1

When maintaining the user distribution field selection (transaction SCUM), you can choose which of the following options?

There are 3 correct answers to this question.

Response:

- A. Fixed
- B. Local
- C. Central
- D. Redistribution
- E. Global

Correct Answer: ACE

QUESTION 2

You are running a system landscape of AS Java-based SAP systems. You want to use the enhanced Change and Transport System (CTS) to transport non-ABAP objects into these systems. Which prerequisites are necessary to perform this task?

There are 2 correct answers to this question.

Response:

- A. The Software Deployment Manager (SDM) of the Transport Domain Controller must be configured for deployment in AS Java-based runtime systems.
- B. Client-dependent transport routes must exist for all SAP systems in your transport domain.
- C. The transport landscape for AS Java-based SAP systems must be maintained in transaction STMS in the Transport Domain Controller.
- D. The AS Java-based SAP systems and the Transport Domain Controller must have the same SAP release level.
- E. An RFC destination to the CTS Deploy Web Service must be configured on the AS ABAP-based Transport Domain Controller.

Correct Answer: CE

QUESTION 3

You have established a backup strategy using online backups. You would like to restore your database to an earlier point in time, well AFTER the last online backup. Which files are needed for this point in time recovery?

- A. All data files, the control file, and the database parameter file
- B. All offline redo log files, the control file, and the Oracle executables
- C. Online redo log files and the control file
- D. All data files, the control file, and all redo logs written during and since the last online backup

Correct Answer: D

QUESTION 4

You have changed the password of the administrative user of an AS Java- based SAP system. Is there any additional recommended task related to this password change? Please choose the correct answer.

- A. Yes - changing the secure store content by using the Config Tool is recommended.
- B. No - changing the administrator's password is sufficient.
- C. Yes - changing the respective database entry by using the Config Tool is recommended.
- D. Yes - changing the secure store content by using the command line";icmon -"; is recommended.

Correct Answer: A

QUESTION 5
