### QUESTION 1

The MRP run detected a shortage of a material that you source from an external supplier in full pallets. How can you make sure you will only receive full pallets?

- A. Use the fixed lot procedure.
- B. Use the MRP type for vendor managed inventory.
- C. Use the minimum order quantity
- D. Use the reorder point

Correct Answer: A

---

### QUESTION 2

You want to set up a make-to-order planning scenario for finished material. The bill of material contains two components: one should be procured for each sales order individually, the other one should be procured jointly for all independent requirements. Forecasting for the finished product is NOT possible. Which setting do you make to achieve this?

- A. Choose planning strategy 50 (Planning without final assembly) and select corresponding Mixed MRP indicator
- B. Choose planning strategy 20 (Make-to-order) and select corresponding Individual/collective indicator
- C. Choose planning strategy 20 (Make-to-order) and select corresponding Mixed MRP indicator
- D. Choose planning strategy 50 (Planning without final assembly) and select corresponding Individual/collective indicator

Correct Answer: D

---

### QUESTION 3

How can SAP S/4HANA support a GMP-compliant production process? (Choose 3)

- A. Approved resources
- B. GMP-compliant flag
- C. Recipe approval
- D. Batch record
- E. Digital signature

Correct Answer: CDE

---

**QUESTION 4**

What are the consequences when you assign a planned order to a production line manually, using the planning table in repetitive manufacturing?

- A. The planned order's component availability is checked.
- B. The planned order is converted to production order.
- C. The planned order's components are copied to the picking list.
- D. The planned order generates capacity requirements

Correct Answer: D

---

**QUESTION 5**

Mode selection is one of the scheduling options available in Advanced Planning in SAP S/4HANA. When can you use mode selection?

- A. When multiple operations are maintained for one product
- B. When alternate resources are used within one operation
- C. When multiple planned orders exist on one resource
- D. When multiple production versions are maintained for one product

Correct Answer: B
