QUESTION 1

What do you have to consider when you change customer master data? (Choose two)

A. Customer master data is transferred to the sales order and cannot be changed there.

B. Several different partner functions can be assigned in the sales area data of the customer master.

C. Address changes in the customer master affect existing documents in the system.

D. A customer can have only one unloading point.

Correct Answer: BC

QUESTION 2

You want to combine items from different sales orders into one delivery document.

Which common characteristics are required? (Choose two.)

A. Payment terms

B. Ship-to party

C. Shipping point

D. Order type

Correct Answer: BC

QUESTION 3

You have configured a sales document type with the following number systems:

Number range internal assignment: 01 Number range external assignment: 02 Item number increment: 10 Subitem increment: 1.

What are the actions and consequences when you create a sales order based on this document type? (Choose two)

A. Action: You enter a sales document number manually and save the sales document. Consequence: A number from number range 01 is assigned to the document.

B. Action: You enter a bill of material (BOM). Consequence: The subitems are numbered with increments of one.

C. Action: You enter a sales document. Consequence: You can enter an external document number from number range 02 or receive an internally assigned document number after saving.
