### QUESTION 1

What is the maximum number of levels of authorizations you can set up in Dual Control?

- A. 1
- B. 2
- C. 3
- D. 4

Correct Answer: B

Require multi-level password access approval – This advanced setting enforces an access control workflow in which end users require two levels of authorization before they can access privileged accounts.

### QUESTION 2

Which report could show all audit data in the vault?

- A. Privileged Account Compliance Status Report
- B. Activity Log
- C. Privileged Account Inventory Report
- D. Application Inventory Report

Correct Answer: B

A log of all the activities that have taken place in the Safes. This report can be filtered according to user, target system, specified period, and a variety of other criteria.

Authorized users can view a list of changes that have been made in the Master Policy by generating an Activities report. This includes changes made in Master Policy rules, as well as adding, modifying, and deleting exceptions.

---

### QUESTION 3

It is impossible to override Master Policy settings for a Platform.

- A. TRUE
- B. FALSE

Correct Answer: B

---

#### QUESTION 4

Which is the purpose of the HeadStartInterval setting in a platform?

- A. It determines how far in advance audit data is collected for reports.
- B. It instructs the CPM to initiate the password change process certain number of days before expiration.
- C. It instructs the AIM provider to '\\skip the cache\\' during the defined time period.
- D. It alerts users of upcoming password changes a certain number of days before expiration.

Correct Answer: B
