QUESTION 1

Hyperledger Fabric Consensus is planned out into 3 phases. Which one is NOT a phase?

A. Ordering

B. Endorsement

C. Voting

D. Validation

Correct Answer: C

QUESTION 2

The keyword is used if you do not want the resource to be instantiated while still used as a super type for the other resources of that type.

A. extends

B. noinstantiate

C. concrete

D. abstract

Correct Answer: D

QUESTION 3

Smart contracts are created by computer programmers through the help of smart contract development tools and are entirely digital. These programs are usually written using programming code languages. Which of the following languages would not be ideal for use in smart contracts?

A. Python

B. Assembler

C. C++

D. Go

E. Java

Correct Answer: B

Assembler languages are not web or html friendly nor high level.

QUESTION 4

What is a web-based tool allows developers to learn Hyperledger Composer, model out their business network (domain), test that network, and deploy that network to a live instance of a blockchain network?

A. Hyperledger Composer Runtime

B. Hyperledger Composer Playground

C. Hyperledger Explorer

D. Hyperledger Quilt

Correct Answer: B

This web-based tool allows developers to learn Hyperledger Composer, model out their business network (domain), test that network, and deploy that network to a live instance of a blockchain network. The playground keeps the development model in browser storage, allowing them to be easily uploaded or downloaded. The playground also allows for CRUD (create, read, update, delete) operations to be performed on asset transactions which are created and logged. Composer playground offers a repository of sample business networks that can provide a base for building your own business network.

QUESTION 5

Which of the characteristic is desired in a DLT for business?

A. Permissioned

B. Confidential Transaction

C. No Cryptocurrency

D. Programmable

E. All of the above

Correct Answer: D
