**QUESTION 2**

Hyperledger can best be described as a _____?

A. Blockchain that exclusively supports PoS Consensus

B. Permissionless blockchain

C. Token

D. Blockchain that exclusively supports PoW Consensus

E. Umbrella collaboration of open source blockchains

Correct Answer: E

hyperledger is an open source collaborative effort created to advance cross-industry blockchain technologies. It is a global collaboration, hosted by The Linux Foundation, including leaders in finance, banking, Internet of Things, supply chains, manufacturing and Technology.

**QUESTION 3**

You are currently consulting with an organization that ships widgets overseas. They would like to implement a Hyperledger Fabric and would like to know about how to use cryptocurrencies with Hyperledger Fabric.

What is the best answer?

A. If they need a native currency for their chain network, they can develop their own native currency with chaincode.

B. Hyperledger Fabric can be integrated with any crypto currency by using the proper APIs.

C. If they need a native currency for their chain network, they must use Ripple currency with chaincode.

D. If they need a native currency for their chain network, they must use Ethereum currency with chaincode.

E. Hyperledger Fabric does not support cryptocurrencies.

Correct Answer: A

If you really need a native currency for your chain network, you can develop your own native currency with chaincode. One common attribute of native currency is that some amount will get transacted (the chaincode defining that currency will get called) every time a transaction is processed on its chain.
