QUESTION 1

A Digital Developer must give users the ability to choose an occasion (holiday, birthday, anniversary, etc.) for which gifts are currently being selected. The data needs to be persistent throughout the current shopping experience.

Which data store variable is appropriate, assuming there is no need to store the selection in any system or custom objects?

- A. Request scope variable
- B. Session scope variable
- C. Page scope variable
- D. Content slot variable

Correct Answer: B

QUESTION 2

A Digital Developer has detected storefront pages being rendered with an error message. After inspecting the log files, the Developer discovered that an enforced quota is being exceeded. What action should the Developer take to stop the quota violation?

- A. Change the Business Manager configuration for the quota settings.
- B. Ask support to remove the quota limit.
- C. Rewrite the code that is causing the overage.
- D. Take no action, the overage will be resolved when concurrent visitors are reduced.

Correct Answer: A

QUESTION 3

A Digital Developer added a file named `MyBusinessController.js` in the cartridge named `app_project`. The project design calls for this new file to override `MyBusinessControiier.3s` in `claient_project`. The `client_project` cartridge contains other necessary functionality. Additional functionality is also included in the `storefront_core` and `storefront_controliers` cartridges.

Which cartridge path meets the project requirements?

- A. `app_project:client_project:storefront_controllers:storefront_core`
- B. `client_project:app_project:storefront_controllers:storefront_core`

C. storefront_core:storefront_controllers:client_project:app_project

D. app_project:storefront_controllers:storefront_core

Correct Answer: A

QUESTION 4

A Digital Developer has been given a requirement to add fault tolerance to an existing web service integration that uses Service Framework. Administrators at Universal Containers need to be able to configure the timeout and rate limiting.

Which approach should the Developer use to implement the requirement?

A. Implement a serviceUnavaiaibleException exception handler to execute fallback code.

B. Use the setTimeout method to execute fallback code if the request has NOT completed.

C. Create a site preference to store timeout settings and implement an IOException handler to execute fallback code.

D. Implement a condition that checks to see if the response was empty and execute fallback code if true.

Correct Answer: A

QUESTION 5

Why Should a Digital Developer use ProductSearchModel.getProducts() instead Of Category.getOnlineProduccs () to access products?

A. It is more readable code.

B. It has fewer lines of code.

C. It uses the search index.

D. It reduces accesses to the application server.

Correct Answer: C
