### QUESTION 1

A Digital Developer is working on a project to convert a pipeline to a JavaScript controller. UX Studio has a functioning pipeline debugger configured for the site. Assume the Developer will add a breakpoint to the controller when it is written.

What must be done in order to use the debugger with the new controller when it is written?

- A. Modify the debugger configuration and use the existing pipeline debugger.
- B. Create and use a new controller debug configuration.
- C. Create and use a new script debug configuration.
- D. Use the existing pipeline debugger.

Correct Answer: C

---

### QUESTION 2

Which line of code creates a content slot that can be included on homepage.isml to display on the home page?

- A.
- B.
- C.
- D.

Correct Answer: A

---

### QUESTION 3

A Digital Developer added a file named MyBusinessController.js in the cartridge named app\_project. The project design calls for this new file to override MyBusinessController.js in client\_project. The client\_project cartridge contains other necessary functionality. Additional functionality is also included in the storefront\_core and storefront\_controllers cartridges.

Which cartridge path meets the project requirements?

- A. app\_project:client\_project:storefront\_controllers:storefront\_core
- B. client\_project:app\_project:storefront\_controllers:storefront\_core
- C. storefront\_core:storefront\_controllers:client\_project:app\_project
- D. app\_project:storefront\_controllers:storefront\_core

Correct Answer: A

#### QUESTION 4

The following code ensures that an address ID CANNOT be used if it is already in use by another address in the customer's address book. There is a problem with the code. The error message for an invalid address ID is never shown to the user on the form field.

```
if (address.ID !== addressForm.addressid.value) {  
    for (var i = 0; i < addressBook.addresses.length; i++) {  
        if (addressBook.addresses[i].ID === addressForm.addressid.value) {  
            addressForm.invalidateFormElement();  
            throw new Error('Address name already exists');  
        }  
    }  
}
```

How should the Digital Developer resolve this issue so that the error message is displayed on the address ID form field?

- A. addressForm.invalidateFormElement(addressForm.addressid);
- B. addressForm.addressid.invalidateFormElement();
- C. addressForm.addressid.invalidateFormElement = true;
- D. addressForm.invalidateFormElement("addressid");

Correct Answer: D

#### QUESTION 5

A Digital Developer must resolve a performance issue with product tiles. The Developer determines that the product tiles are NOT being cached for a long enough period. Which two methods can the Developer use to verify the cache settings for the product tiles? Choose 2 answers

- A. Enable the template debugger to verify the cache times for the producttile.isml template.
- B. View the product list page cache settings provided in the Administration > Manage Sites Business Manager module.
- C. View the cache information provided by the Merchant Tools > Technical Reports Business Manager module.
- D. Enable cache information in the storefront toolkit and view the cache information for the product tile.

Correct Answer: CD
