QUESTION 1

What are the components of an encryption system?

- A. User, data, and encryption engine
- B. Data, encryption engine, and decryption tool
- C. User, encryption engine, and key management
- D. Data, encryption engine, and key management
- E. User, data, and key management

Correct Answer: D

QUESTION 2

Which statement best describes the impact of Cloud Computing on business continuity management?

- A. A general lack of interoperability standards means that extra focus must be placed on the security aspects of migration between Cloud providers.
- B. The size of data sets hosted at a Cloud provider can present challenges if migration to another provider becomes necessary.
- C. Customers of SaaS providers in particular need to mitigate the risks of application lock-in.
- D. Clients need to do business continuity planning due diligence in case they suddenly need to switch providers.
- E. Geographic redundancy ensures that Cloud Providers provide highly available services.

Correct Answer: E

QUESTION 3

What is true of searching data across cloud environments?

- A. You might not have the ability or administrative rights to search or access all hosted data.
- B. The cloud provider must conduct the search with the full administrative controls.
- C. All cloud-hosted email accounts are easily searchable.
- D. Search and discovery time is always factored into a contract between the consumer and provider.
- E. You can easily search across your environment using any E-Discovery tool.

Correct Answer: A
