QUESTION 1

When dealing with PII, which category pertains to those requirements that can carry legal sanctions or penalties for failure to adequately safeguard the data and address compliance requirements?

- A. Contractual
- B. Jurisdictional
- C. Regulated
- D. Legal

Correct Answer: C

Regulated PII pertains to data that is outlined in law and regulations. Violations of the requirements for the protection of regulated PII can carry legal sanctions or penalties. Contractual PII involves required data protection that is determined by the actual service contract between the cloud provider and cloud customer, rather than outlined by law. Violations of the provisions of contractual PII carry potential financial or contractual implications, but not legal sanctions. Legal and jurisdictional are similar terms to regulated, but neither is the official term used.

QUESTION 2

What category of PII data can carry potential fines or even criminal charges for its improper use or disclosure?

- A. Protected
- B. Legal
- C. Regulated
- D. Contractual

Correct Answer: C

Regulated PII data carries legal and jurisdictional requirements, along with official penalties for its misuse or disclosure, which can be either civil or criminal in nature. Legal and protected are similar terms, but neither is the correct answer in this case. Contractual requirements can carry financial or contractual impacts for the improper use or disclosure of PII data, but not legal or criminal penalties that are officially enforced.

QUESTION 3

Which of the following is NOT a function performed by the handshake protocol of TLS?

- A. Key exchange
- B. Encryption
- C. Negotiation of connection
- D. Establish session ID

Correct Answer: B

The handshake protocol negotiates and establishes the connection as well as handles the key exchange and establishes the session ID. It does not perform the actual encryption of data packets.

QUESTION 4

Different types of audits are intended for different audiences, such as internal, external, regulatory, and so on.

Which of the following audits are considered "restricted use" versus being for a more broad audience?

- A. SOC Type 2
- B. SOC Type 1
- C. SOC Type 3
- D. SAS-70

Correct Answer: B

SOC Type 1 reports are intended for restricted use, only to be seen by the actual service organization, its current clients, or its auditors. These reports are not intended for wider or public distribution. SAS-70 audit reports have been deprecated and are no longer in use, and both the SOC Type 2 and 3 reports are designed to expand upon the SOC Type 1 reports and are for broader audiences.

QUESTION 5

What is one of the reasons a baseline might be changed?

- A. Numerous change requests
- B. To reduce redundancy
- C. Natural disaster
- D. Power fluctuation

Correct Answer: A

If the CMB is receiving numerous change requests to the point where the amount of requests would drop by modifying the baseline, then that is a good reason to change the baseline. None of the other reasons should involve the baseline at all.
