QUESTION 1

What does it mean to "rationalize" data protection requirements?

- A. Evaluate the costs and risks of applicable laws and regulations and address those that have the greatest penalties
- B. Look for overlaps in laws and regulations from which a common solution can be developed
- C. Determine where laws and regulations are redundant in order to eliminate some from requiring compliance
- D. Address the less stringent laws and regulations, and inform stakeholders why they are applicable

Correct Answer: C

QUESTION 2

Which is the best way to view an organization's privacy framework?

- A. As an industry benchmark that can apply to many organizations
- B. As a fixed structure that directs changes in the organization
- C. As an aspirational goal that improves the organization
- D. As a living structure that aligns to changes in the organization

Correct Answer: B

QUESTION 3

SCENARIO

Please use the following to answer the next QUESTION:

For 15 years, Albert has worked at Treasure Box ?a mail order company in the United States (U.S.) that used to sell decorative candles around the world, but has recently decided to limit its shipments to customers in the 48 contiguous states. Despite his years of experience, Albert is often overlooked for managerial positions. His frustration about not being promoted, coupled with his recent interest in issues of privacy protection, have motivated Albert to be an agent of positive change.

He will soon interview for a newly advertised position, and during the interview, Albert plans on making executives aware of lapses in the company's privacy program. He feels certain he will be rewarded with a promotion for preventing negative consequences resulting from the company's outdated policies and procedures.

For example, Albert has learned about the AICPA (American Institute of Certified Public Accountants)/CICA (Canadian Institute of Chartered Accountants) Privacy Maturity Model (PMM). Albert thinks the model is a useful way to measure Treasure Box's ability to protect personal data. Albert has noticed that Treasure Box fails to meet the requirements of the highest level of maturity of this model; at his interview, Albert will pledge to assist the company with meeting this level in order to provide customers with the most rigorous security available.

Albert does want to show a positive outlook during his interview. He intends to praise the company's commitment to

the security of customer and employee personal data against external threats. However, Albert worries about the high turnover rate within the company, particularly in the area of direct phone marketing. He sees many unfamiliar faces every day who are hired to do the marketing, and he often hears complaints in the lunch room regarding long hours and low pay, as well as what seems to be flagrant disregard for company procedures.

In addition, Treasure Box has had two recent security incidents. The company has responded to the incidents with internal audits and updates to security safeguards. However, profits still seem to be affected and anecdotal evidence indicates that many people still harbor mistrust. Albert wants to help the company recover. He knows there is at least one incident the public is unaware of, although Albert does not know the details. He believes the company's insistence on keeping the incident a secret could be a further detriment to its reputation. One further way that Albert wants to help Treasure Box regain its stature is by creating a toll-free number for customers, as well as a more efficient procedure for responding to customer concerns by postal mail.

In addition to his suggestions for improvement, Albert believes that his knowledge of the company's recent business maneuvers will also impress the interviewers. For example, Albert is aware of the company's intention to acquire a medical supply company in the coming weeks.

With his forward thinking, Albert hopes to convince the managers who will be interviewing him that he is right for the job.

What is one important factor that Albert fails to consider regarding Treasure Box's response to their recent security incident?

- A. Who has access to the data
- B. What the nature of the data is
- C. How data at the company is collected
- D. How long data at the company is kept

Correct Answer: D

QUESTION 4

During a merger and acquisition, the most comprehensive review of privacy risks and gaps occurs when conducting what activity?

- A. Transfer Impact Assessment (TIA).
- B. Risk identification review.
- C. Due diligence.
- D. Integration.

Correct Answer: C

QUESTION 5

What is the Privacy Officer's first action after being told that her firm is planning to sell its credit card processing

business?

- A. Perform a Record of Processing Activity (ROPA).
- B. Review technical security controls.
- C. Review contractual obligations.
- D. Review data mapping.

Correct Answer: C
