QUESTION 1

Which of the following actions is NOT required during a data privacy diligence process for Merger and Acquisition (MandA) deals?

- A. Revise inventory of applications that house personal data and data mapping.
- B. Update business processes to handle Data Subject Requests (DSRs).
- C. Compare the original use of personal data to post-merger use.
- D. Perform a privacy readiness assessment before the deal.

Correct Answer: D

QUESTION 2

Protection from threats to facilities, systems that process and store electronic copies, and IT work/equipment locations best describes which category of security control?

- A. Physical Control.
- B. Technical Control.
- C. Geographic Control.
- D. Administrative Control.

Correct Answer: A

QUESTION 3

What is least likely to be achieved by implementing a Data Lifecycle Management (DLM) program?

- A. Reducing storage costs.
- B. Ensuring data is kept for no longer than necessary.
- C. Crafting policies which ensure minimal data is collected.
- D. Increasing awareness of the importance of confidentiality.

Correct Answer: C

QUESTION 4

In which situation would a Privacy Impact Assessment (PIA) be the least likely to be required?

- A. If a company created a credit-scoring platform five years ago.
- B. If a health-care professional or lawyer processed personal data from a patient's file.
- C. If a social media company created a new product compiling personal data to generate user profiles.
- D. If an after-school club processed children's data to determine which children might have food allergies.

Correct Answer: D

QUESTION 5

SCENARIO Please use the following to answer the next QUESTION: Henry Home Furnishings has built high-end furniture for nearly forty years. However, the new owner, Anton, has found some degree of disorganization after touring the company headquarters. His uncle Henry had always focused on

production, not data processing, and Anton is concerned. In several storage rooms, he has found paper files, disks, and old computers that appear to contain the personal data of current and former employees and customers. Anton knows

that a single break-in could irrevocably damage the company's relationship with its loyal customers. He intends to set a goal of guaranteed zero loss of personal information.

To this end, Anton originally planned to place restrictions on who was admitted to the physical premises of the company. However, Kenneth, his uncle's vice president and longtime confidante, wants to hold off on Anton's idea in favor of

converting any paper records held at the company to electronic storage. Kenneth believes this process would only take one or two years. Anton likes this idea; he envisions a password-protected system that only he and Kenneth can access.

Anton also plans to divest the company of most of its subsidiaries. Not only will this make his job easier, but it will simplify the management of the stored data. The heads of subsidiaries like the art gallery and kitchenware store down the street will be responsible for their own information management. Then, any unneeded

subsidiary data still in Anton's possession can be destroyed within the next few years.

After learning of a recent security incident, Anton realizes that another crucial step will be notifying customers. Kenneth insists that two lost hard drives in Question are not cause for concern; all of the data was encrypted and not sensitive in

nature. Anton does not want to take any chances, however. He intends on sending notice letters to all employees and customers to be safe.

Anton must also check for compliance with all legislative, regulatory, and market requirements related to privacy protection. Kenneth oversaw the development of the company's online presence about ten years ago, but Anton is not confident about his understanding of recent online marketing laws. Anton is assigning another trusted employee with a law background the task of the compliance assessment. After a thorough analysis, Anton knows the company should be safe for another five years, at which time he can order another check.

Documentation of this analysis will show auditors due diligence.

Anton has started down a long road toward improved management of the company, but he knows the effort is worth it. Anton wants his uncle's legacy to continue for many years to come.

What would the company's legal team most likely recommend to Anton regarding his planned communication with customers?

- A. To send consistent communication.
- B. To shift to electronic communication.
- C. To delay communications until local authorities are informed.
- D. To consider under what circumstances communication is necessary.

Correct Answer: D
