QUESTION 1

What is an Access Control List?

A. A list of steps necessary for an individual to access a resource.

B. A list that indicates the type of permission granted to each individual.

C. A list showing the resources that an individual has permission to access.

D. A list of individuals who have had their access privileges to a resource revoked.

Correct Answer: B

QUESTION 2

Truncating the last octet of an IP address because it is NOT needed is an example of which privacy principle?

A. Use Limitation

B. Data Minimization

C. Purpose Limitation

D. Security Safeguards

Correct Answer: B

truncating the last octet of an IP address because it is not needed is an example of data minimization. Data minimization is a privacy principle that involves collecting and processing only the minimum amount of personal data necessary for a specific purpose.

QUESTION 3

A healthcare provider would like to data mine information for research purposes; however, the Chief Privacy Officer is concerned medical data of individuals may be disclosed. To overcome the concern, which is the preferred technique for protecting such data while still allowing for analysis?

A. Anthropomorphism.

B. Encryption.

C. Isolation.

D. Perturbation.

Correct Answer: D

QUESTION 4

Data oriented strategies Include which of the following?

A. Minimize. Separate, Abstract, Hide.

B. Inform, Control, Enforce, Demonstrate.

C. Encryption, Hashing, Obfuscation, Randomization.

D. Consent. Contract, Legal Obligation, Legitimate interests.

Correct Answer: A

data oriented strategies include minimizing the amount of personal data collected and processed (Minimize), separating personal data from other data (Separate), abstracting personal data so that it is less identifiable (Abstract), and hiding personal data so that it is not easily accessible (Hide).

QUESTION 5

SCENARIO

Kyle is a new security compliance manager who will be responsible for coordinating and executing controls to ensure compliance with the company\'s information security policy and industry standards. Kyle is also new to the company, where collaboration is a core value. On his first day of new-hire orientation, Kyle\'s schedule included participating in meetings and observing work in the IT and compliance departments.

Kyle spent the morning in the IT department, where the CIO welcomed him and explained that her department was responsible for IT governance. The CIO and Kyle engaged in a conversation about the importance of identifying meaningful IT governance metrics. Following their conversation, the CIO introduced Kyle to Ted and Barney. Ted is implementing a plan to encrypt data at the transportation level of the organization\'s wireless network. Kyle would need to get up to speed on the project and suggest ways to monitor effectiveness once the implementation was complete. Barney explained that his short-term goals are to establish rules governing where data can be placed and to minimize the use of offline data storage.

Kyle spent the afternoon with Jill, a compliance specialist, and learned that she was exploring an initiative for a compliance program to follow self-regulatory privacy principles. Thanks to a recent internship, Kyle had some experience in this area and knew where Jill could find some support. Jill also shared results of the company\'s privacy risk assessment, noting that the secondary use of personal information was considered a high risk.

By the end of the day, Kyle was very excited about his new job and his new company. In fact, he learned about an open position for someone with strong qualifications and experience with access privileges, project standards board approval

processes, and application-level obligations, and couldn\'t wait to recommend his friend Ben who would be perfect for the job.

Which of the following should Kyle recommend to Jill as the best source of support for her initiative?

A. Investors.

B. Regulators.

C. Industry groups.

D. Corporate researchers.

Correct Answer: C

Jill is leading an initiative to develop a new industry standard for data privacy and security. Kyle should recommend that Jill seek support from industry groups as they are likely to have a vested interest in the development of such a standard and may be able to provide valuable input and resources.
