### QUESTION 1

Pipelines often require access to protected resources such as servers, databases, and SCMs. Without using an external credentials manager, which of the following provides the most secure centralized mechanism for managing the "secrets" that Jenkins requires to login/authenticate (for example: keys, tokens, passwords)?

- A. Store the secrets on the Jenkins master using the Credentials plugin.
- B. Include the secrets in the home directory of the Jenkins agent account.
- C. Store the secrets required in the SCM alongside the application source code.
- D. Embed secrets into the build and deployment scripts invoked by the job.
- E. Store the secrets as Node Properties for each agent definition.

Correct Answer: A

---

### QUESTION 2

Which enables you to use artifacts from a completed build in the workspace of the currently running build?

- A. Jenkins core
- B. Copy Artifact plugin.
- C. Rebuild plugin.
- D. ArtifactDeployer plugin.

Correct Answer: B

---

### QUESTION 3

A Freestyle job is configured to execute concurrent builds, and to only build on a specific agent (agent A) that has 4 executors. You observe that 2 instances of the job are currently building while several others are waiting in the build queue. Which of the following could explain why the builds are waiting in the build queue?

- A. There are not enough idle executors available on agent A.
- B. Changes were made to this job's configuration while this Job had builds in the build queue.
- C. Each build in the build queue must be manually attached to an available executor.
- D. The "Execute concurrent builds if necessary" option in the job configuration has reached its user-defined maximum.

Correct Answer: A

---

### QUESTION 4

Which is the about the "Build Triggers" functionality in Jenkins?

- A. It allows you to customize what specific IP address will never be able to trigger a build.
- B. It allows you to trigger a build under certain conditions, such as GitHub/BitBucket push events, deployment ratifications,
- C. It can only be configured on Freestyle projects.
- D. It allows you to customize the mail to be sent to developers after a failing build.

Correct Answer: B

---

#### QUESTION 5

Which are Source Code Management tools?

Choose 3 answers

- A. Java
- B. Perforce
- C. Subversion
- D. Git
- E. Maven

Correct Answer: BCD
