QUESTION 1

You\\'ve been promoted at work and are now in charge of the system administrators that look after the Jenkins platform for your company. You no longer want to get notifications from Jenkins, but your subordinates don\\'t know what settings to change in a Jenkinsfile. You give them a look, and say one of the following is what needs to be changed:

A. notice

B. alert

C. email

D. emailext

Correct Answer: D

The emailext function can be used from a Jenkinsfile to configure notifications.

QUESTION 2

Freestyle job configurations provide a post-build action that allows you to build other projects after a build of this job. Which trigger conditions are supported? Choose 3 answers

A. Trigger even if the build fails.

B. Trigger only if the build succeeds during working hours.

C. Trigger only if the build produces artifacts.

D. Trigger only if the build succeeds.

E. Trigger even if the build is unstable.

Correct Answer: B

QUESTION 3

The QA department has been having issues locating their work on the Jenkins server. As a result, their manager has asked for the jobs (projects) to be better organized. Which most correct answer can you use to organize projects?

A. Folders and views

B. Relational Database

C. Folders

D. Views

Correct Answer: A

You can organize projects in Jenkins with folders and views.

QUESTION 4

How do you use the Jenkins CLI?

A. jcli

B. There is no Jenkins CLI

C. java -jar /var/lib/jenkins/jenkins-cli.jar -s http://:8080/

D. jenkins

Correct Answer: C

QUESTION 5

A Freestyle job has the configuration shown here:

```
<project>
    <actions/>
    <description/>
    <keepDependencies>false</keepDependencies>
    <scm class="hudson.plugins.git.GitSCM" plugin="git@2.3.5">
        <configVersion>2</configVersion>
        <userRemoteConfigs>
            <hudson.plugins.git.UserRemoteConfig>
            <url>git@github.com:cloudbees/github-test.git</url>
            </hudson.plugins.git.UserRemoteConfig>
        </userRemoteConfigs>
        <branches>
            <hudson.plugins.git.BranchSpec>
                <name>*/development</name>
            </hudson.plugins.git.BranchSpec>
        </branches>
        <doGenerateSubmoduleConfigurations>false</doGenerateSubmoduleConfigurations>
        <gitTool>Default</gitTool>
        <submoduleCfg class="list"/>
        <extensions/>
    </scm>
    <canRoam>true</canRoam>
    <disabled>false</disabled>
    <jdk>(Default)</jdk>
    <triggers>
        <hudson.triggers.SCMTrigger>
            <spec/>
            <ignorePostCommitHooks>false</ignorePostCommitHooks>
        </hudson.triggers.SCMTrigger>
    </triggers>
```

You run the following command from a Unix terminal: curl http: ///git/notifyCommit? url-gitagithub.com: cloudbees/github test.git Will the Job be triggered?

A. It will not be triggered.

B. It will be triggered if the polling detects a change In any git branch.

C. It will be triggered if the polling detects a change In the git branch "master".

D. It will be triggered if the polling detects a change in the git branch "development".

Correct Answer: D
