QUESTION 1

An organization meets their service level objective (SLO) of 99.999% ("five nines") How much downtime do their end users experience per year?

- A. 5 minutes
- B. 500 minutes
- C. 5 hours
- D. 5 days

Correct Answer: A

QUESTION 2

What type of cloud computing service provides raw compute, storage, and network, organized in ways that are familiar to physical data centers?

- A. Database as a Service.
- B. Platform as a Service.
- C. Infrastructure as a Service.
- D. Software as a Service.

Correct Answer: C

What is Infrastructure as a service :

IaaS (infrastructure as a service) is a computing model that offers resources on-demand to businesses and individuals via the cloud. IaaS is attractive because acquiring computing resources to run applications or store data the traditional way

requires time and capital. Enterprises must purchase equipment through procurement processes that can take months. They must invest in physical spaces:

typically specialized rooms with power and cooling. And after deploying the systems, enterprises need IT, professionals, to manage them. All this is challenging to scale when demand spikes or the business grows. Enterprises risk running out

of capacity or overbuilding and ending up with infrastructure that suffers from low utilization.

These challenges are why IaaS use is steadily growing. Learn more about Compute Engine, Cloud Storage, etc.

QUESTION 3

An organization decides to migrate their on-premises environment to the cloud They need to determine which resource components still need to be assigned ownership Which two functions does a public cloud provider own? (Choose 2)

- A. Fixing application security issues
- B. Infrastructure architecture
- C. Hardware capacity management
- D. Hardware maintenance
- E. Infrastructure deployment automation

Correct Answer: CD

QUESTION 4

Several departments in an organization are working together on a project. The organization wants to customize access to resources for each department. What is the quickest and most efficient way to achieve this?

- A. By mapping IAM roles to job functions for each department
- B. By assigning IAM primitive roles to each employee
- C. By applying least-privilege to roles for each employee
- D. By creating a single shared service account for all departments

Correct Answer: A

QUESTION 5

An organization wants to write and run small pieces of code in a serverless way that respond to events like huge discounts. Which Google Cloud compute solution should the organization use?

- A. Google Kubernetes Engine
- B. Cloud Functions
- C. Bare Metal Solution
- D. Compute Engine

Correct Answer: B
