QUESTION 1

What might be considered an advantage for someone storing valuables in a bank in comparison to someone storing data in the Cloud?

- A. The bank customer knows where the bank is located and which locker is used to store valuables.
- B. The bank uses physical measures to protect your valuables.
- C. The bank has better protection against fires and floods.
- D. The bank has better opening hours.

Correct Answer: A

QUESTION 2

Why can virus scanning software not run directly on the hypervisor?

- A. because the hypervisor is hidden software
- B. because the hypervisor only guests other operating systems
- C. because the hypervisor runs on a server
- D. because the hypervisor starts up before the virus scanning software

Correct Answer: B

QUESTION 3

The Total Cost of Ownership (TCO) of a Cloud solution may change and in the worst case increase. How can this happen?

- A. In certain cases the TCO is intentionally shortened by lack of vision on future developments.
- B. In certain cases the TCO is just not the right measure for calculating relevant costs and expenditures.
- C. In some cases customers have not acted upon a good business case.
- D. In some cases only the distribution of different components that add up to the TCO may change.

Correct Answer: D

QUESTION 4

In the 2010 white paper Top Threats to Cloud Computing, what does the Cloud Security Alliance (CSA) identify as remediation for unknown risk profile and account?

- A. Good Human Resource vetting procedures
- B. Good SLA structures including Cloud provider compliance audits
- C. Proper testing methods
- D. Strong authentication and access control

Correct Answer: B

QUESTION 5

One of the limitations concerns of Cloud computing is uncertainty about where your data is stored in conjunction with varying national and international legislation on data protection.

Which issue does this raise?

- A. Availability
- B. Confidentiality
- C. Integrity
- D. Security

Correct Answer: B
