### QUESTION 1

What type of columns does Snowflake recommend to be used as clustering keys? (Choose two.)

- A. A VARIANT column
- B. A column with very low cardinality
- C. A column with very high cardinality
- D. A column that is most actively used in selective filters
- E. A column that is most actively used in join predicates

Correct Answer: DE

---

### QUESTION 2

What step can reduce data spilling in Snowflake?

- A. Using a larger virtual warehouse
- B. Increasing the virtual warehouse maximum timeout limit
- C. Increasing the amount of remote storage for the virtual warehouse
- D. Using a Common Table Expression (CTE) instead of a temporary table

Correct Answer: A

Adjusting the available memory of a warehouse can improve performance because a query runs substantially slower when a warehouse runs out of memory, which results in bytes "spilling" onto storage.

### QUESTION 3

Which commands can only be executed using SnowSQL? (Choose two.)

- A. COPY INTO
- B. GET
- C. LIST
- D. PUT
- E. REMOVE

Correct Answer: BD

---

#### QUESTION 4

What is the following SQL command used for?

```
Select * from table(validate(t1, job_id => \'_last\'));
```

- A. To validate external table files in table t1 across all sessions
- B. To validate task SQL statements against table t1 in the last 14 days
- C. To validate a file for errors before it gets executed using a COPY command
- D. To return errors from the last executed COPY command into table t1 in the current session

Correct Answer: D

---

#### QUESTION 5

While attempting to avoid data duplication, which COPY INTO option should be used to load files with expired load metadata?

- A. LOAD\_UNCERTAIN\_FILES
- B. FORCE
- C. VALIDATION\_MODE
- D. LAST\_MODIFIED

Correct Answer: A

To load files whose metadata has expired, set the LOAD\_UNCERTAIN\_FILES copy option to true. The copy option references load metadata, if available, to avoid data duplication, but also attempts to load files with expired load metadata.
