-  **800,000+** Satisfied Customers

QUESTION 1

You are to create a requirements specification for an internet banking software. The system shall perform bank credit transfers and therefore receives from the user, among other information, the bank identification code and the name of the bank. Now things have changed so that only the bank identification code must be entered by the user and the bank name is no longer required. On which part of your documentation do you most likely have to work in order to incorporate this change? (2 Points)

- A. Nowhere, since this is a detail for the architecture.
- B. In the chapter in which the states of the system are described.
- C. As a change in the goals has been communicated, the goals in the specification must be updated.
- D. If it is about inputs and outputs of the system, this change has to be worked into the context diagram.
- E. You have to adjust the class model and/or the data model, which describe the structure of the system's input and output data.

Correct Answer: CD

QUESTION 2

You model invoices and invoice items with a UML class diagram. The total amount of an invoice is calculated by summing up all individual invoice items. This means that an invoice showing 5 article prices contains 5 invoice items. What model element most accurately describes the relationship between invoice and invoice items? (1 Point)

- A. Composition
- B. Aggregation
- C. Generalisation
- D. Association

Correct Answer: A

QUESTION 3

Requirements documentation can either be natural language or model-based. Which two statements are most applicable? (2 Points)

- A. If documentation is model-based, natural language documentation can be dispensed with.
- B. As models are more formal, they offer a higher degree of uniqueness compared to natural language.
- C. In requirements engineering models are more suitable than textual descriptions to reduce the complexity of the entity being considered.
- D. When deciding between model-based and natural language documentation, model-based is preferable.

Correct Answer: AB

QUESTION 4

You carry out modelling of requirements with a use case diagram. Which answer best describes its prospective modelling elements? (1 Point)

- A. Objects, activities and associations
- B. Actors, messages and activities
- C. Objects, use cases and activities
- D. Actors, use cases and associations

Correct Answer: D

QUESTION 5

At a technical college, each student is supervised by a lecturer. Some lecturers supervise several students, some none.

Which of the following class diagrams best shows this student-lecturer relationship? (2 Points)

- A. Option A
- B. Option B
- C. Option C
- D. Option D

Correct Answer: B
