QUESTION 1

Requirements must be checked in terms of content, documentation and agreement. Indicate with regard to this whether each statement is true or false. (2 Points)

True	False	
A	B	Inspection is a checking technique that is very informal but which is therefore also very efficient.
C	D	Field observation is the most frequently used checking technique.
E	F	No more than one tester should ever be used for checking, as this may invite conflicts that hinder the project execution.
G	H	Subject matter conflicts must be resolved before checking, since these conflicts are not recognized in checking.

A, B, D, F, H

Correct Answer: A

QUESTION 2

Which of the following statements best characterizes the relationship between a requirements engineer and a stakeholder in the role of a tester? (1 Point)

- A. The requirements engineer delivers input for the work of the stakeholder.
- B. The output from the requirements engineer is managed by the stakeholder.
- C. The stakeholder delivers input for the requirements engineer.
- D. The stakeholder monitors the work of the requirements engineer.
- E. The work of the requirements engineer is not related to the role of the stakeholder.

Correct Answer: A

QUESTION 3

Requirements documentation can either be natural language or model-based. Which two statements are most applicable? (2 Points)

- A. If documentation is model-based, natural language documentation can be dispensed with.
- B. As models are more formal, they offer a higher degree of uniqueness compared to natural language.
- C. In requirements engineering models are more suitable than textual descriptions to reduce the complexity of the entity being considered.

D. When deciding between model-based and natural language documentation, model-based is preferable.

Correct Answer: AB

QUESTION 4

The activity diagram below shows a simplified order processing procedure. Which of the following statements is correct for this flow? (2 Points)

- A. The flow is not modelled correctly, since no condition (branch) should be present within a fork.
- B. The flow is modelled correctly: the goods branch as well as the export and domestic order branch are processed in parallel to one another.
- C. The flow is not modelled correctly, since the branches for the domestic and export orders must be consolidated via a diamond symbol.
- D. The flow is modelled correctly and the "issue invoice" activity is conducted after the "compile goods" activity.

Correct Answer: C

QUESTION 5

Within system development, conflicts continually arise between stakeholders with regard to the requirements. As a requirements engineer, how do you handle conflicts in projects best? (1 Point)

- A. You resolve the conflict with the best resolution technique available to you.
- B. You analyze the conflict, try to bring about a solution with a suitable technique and document relevant information about the conflict.
- C. You ignore the conflict since this is a matter for project management.
- D. In order to resolve such conflicts you escalate them via the escalation paths defined in the project.

Correct Answer: B
