QUESTION 1

As a requirements engineer, you deal with a diverse range of requirements. A template for natural language functional requirements can help you to formulate different forms of system activities in a more precise way. Which two kinds of system activities are among those supported? (1 Point)

A. User interaction

B. Technical requirement

C. Quality requirements

D. Independent system activity

E. System requirement

Correct Answer: AD

QUESTION 2

Your company uses only text processing as a tool in requirements management. Which two essential tasks for requirements management are least supported by this tool? (1 Point)

A. Version management of individual requirements

B. Generation of result documents

C. Requirements tracing

D. Creation of graphic models

E. Documentation of requirements and goals

Correct Answer: CD

QUESTION 3

Which two pieces of information should always be recorded in the stakeholder list? (1 Point)

A. Importance of the stakeholders

B. Role designation

C. Length of service with a company

D. Disciplinary superior

E. References to previously conducted projects

Correct Answer: BC

QUESTION 4

You are employed as a requirements engineer in a company that develops control software for electric motors. During your work it becomes increasingly evident that the developers are very well aware of the necessary requirements, even though the requirements are not documented in their entirety. Nevertheless, you decide to document requirements systematically. Which two of the following arguments justifies this step? (2 Points)

Documenting requirements systematically is important, because...

A. ... implementation without documented requirements is not possible.

B. ... non-documented requirements are difficult to negotiate between the stakeholders.

C. ... the coverage of the requirements by means of test cases cannot be checked.

D. ... documented requirements are also good requirements.

Correct Answer: CD

QUESTION 5

For an interview, you have prepared a use case diagram for the system to be specified. You decide to talk through a use case in detail with the stakeholder. You receive very useful feedback which must now be documented. Which of the following means of expression is least suitable to document the details of a single use case? (1 Point)

A. State diagram

B. Activity diagram

C. Natural language

D. Context diagram

E. Class diagram

Correct Answer: D
