#### QUESTION 1

In what kind of device is a mini-PCIe 802.11 adapter most likely to be used?

- A. Desktop
- B. Mobile phone
- C. Laptop
- D. USB adapter

Correct Answer: C

---

#### QUESTION 2

Of the following device types, which one is most likely to be used in a highly mobile (use while in motion) use case?

- A. Desktop
- B. Video camera
- C. VoIP handset
- D. Laptop

Correct Answer: D

---

#### QUESTION 3

When configuring an AP to use a RADIUS server, in addition to the RADIUS server IP address and port used, what will always be required?

- A. Administrator password
- B. Super user password
- C. Encryption key
- D. Shared secret

Correct Answer: D

---

#### QUESTION 4

How many non-overlapping channels are available in regulatory domains in the 2.4 GHz frequency band? Select one:

- A. 14

- B. 1
- C. 3
- D. 11

Correct Answer: C

---

#### QUESTION 5

You are experiencing poor call quality on VoIP handsets in a specific area of the building. When you evaluate the area, you see that the strongest AP signal strength in that area is -89 dBm. All APs use Fast BSS Transition. No other roaming problem areas exist. No other call quality areas exist. The same VoIP handsets are used everywhere. What is most likely causing the call quality problems in that area?

- A. Client incompatibility with Fast BSS Transition
- B. Lack of support for 802.11ac on the APs
- C. Lack of support for 802.11ac on the clients
- D. Poor signal strength in the area

Correct Answer: D
