QUESTION 1

Which exhibit represents a Type 2 hypervisor?

A.

B.

C.

D.

Correct Answer: C

Reference: https://searchservervirtualization.techtarget.com/definition/hosted-hypervisor-Type-2- hypervisor

QUESTION 2

What is an accurate statement about variable prefetching?

A. Many blocks that have recently been written to storage by the compute system are retrieved and placed in cache.

B. Many non-contiguous blocks that are not currently required can be retrieved from cache in advance.

C. Storage system prefetches data in multiples of the original I/O request size from the compute system.

D. Storage system prefetches many non-contiguous blocks of data, with varied sizes, from cache.

Correct Answer: D

QUESTION 3

DRAG DROP

What is the correct sequence of steps to authenticate an initiator and a target using one-way Challenge Handshake Authentication Protocol (CHAP) after the initiator performs a login to the target?

Select and Place:

Initiator takes the shared secret and calculates the value using a one-way has function and returns a hash value to the target	STEP 1
Authentication is acknowledged and access is granted if the hash value matches	STEP 2
Target sends a CHAP challenge to the initiator	STEP 3
Target computes the expected hash value from the shared secret and compares the value received from the initiator	STEP 4

Correct Answer:

	Target sends a CHAP challenge to the initiator
	Initiator takes the shared secret and calculates the value using a one-way has function and returns a hash value to the target
	Target computes the expected hash value from the shared secret and compares the value received from the initiator
	Authentication is acknowledged and access is granted if the hash value matches

QUESTION 4

Which management function involves configuring LUN masking to restrict hosts from accessing a specific LUN in a data center environment?

A. Performance Management

B. Change Management

C. Security Management

D. Configuration Management

Correct Answer: C

Reference: https://sites.google.com/site/testwikiforfirstciscolab/shd/14-securing-the-storage-infrastructure

QUESTION 5

A company has virtualized their data center and wants to deploy a recovery-in-place backup approach. What is the advantage of this type of approach?

A. Acquires backup services through a self-service portal

B. Eliminates the backup impact on the application servers

C. Reduces the recovery point objective to restore the data to any previous point-in-time using backed up VMs

D. Eliminates the need to transfer the image from the backup device to the primary storage before it is restarted

Correct Answer: D
