### QUESTION 1

In which technique does an application maintain limited functionality, even when some of the modules or supporting services of that application become unavailable?

- A. Retry logic
- B. Persistent state model
- C. Graceful degradation
- D. Checkpointing

Correct Answer: C

### QUESTION 2

DRAG DROP

Match each information security concept with its description.

Select and Place:

| Concept         | Description  |
|-----------------|--|
| Availability    | Ensures the required secrecy of information                                      |
| Integrity       | Ensures that unauthorized changes to information are not allowed                 |
| Accountability  | Ensures that authorized users have reliable and timely access to cloud resources |
| Confidentiality | Ensures users are answerable for the actions executed on the system              |

Correct Answer:

| Concept | Description     |
|---------|-----------------|
|         | Confidentiality |
|         | Integrity       |
|         | Availability    |
|         | Accountability  |

### QUESTION 3

What is an advantage of adopting a microservices strategy in an application development environment?

- A. All microservices of an application are always updated at the same time for maintaining consistency in the application
- B. Every microservice can be deployed, upgraded, scaled, and restarted independent of other services in the application
- C. Microservices are tightly coupled so it is easy to scale all the services at once to meet business demands
- D. Microservices provide the application platform to implement DevOps in the organization easily and at low cost

Correct Answer: B

### QUESTION 4

What is a characteristic of storage resource pools?

- A. Resource pools should always be created by different types of storage devices
- B. Resources are reserved by the application after being released by the consumer
- C. Resources are dynamically released to the pool when the consumer exceeds their quota
- D. Resources are dynamically allocated based on consumer demand

Correct Answer: D

#### QUESTION 5

What is a function of the discovery operation during the service operation phase of the cloud service lifecycle?

- A. Collects information about people involved in the service operations
- B. Collects information about services available in the catalog
- C. Provides visibility into each Cloud service asset employed
- D. Restores service levels while continuously optimizing operations

Correct Answer: A
