### QUESTION 1

Which Dell EMC product is used for a disk-based backup and recovery solution that provides inherent source-based data deduplication?

- A. NetWorker
- B. ProtectPoint
- C. Data Domain
- D. Avamar

Correct Answer: D

---

### QUESTION 2

An organization needs to deploy remote replication between two sites that are 100 km (62 miles) apart. The organization requires a near zero recovery point objective.

Which solution would you recommend?

- A. Hypervisor-based asynchronous replication
- B. Synchronous replication
- C. Snapshot replication
- D. Asynchronous replication

Correct Answer: B

---

### QUESTION 3

What capability does an orchestration workflow provide?

- A. Helps administer the cloud infrastructure, such as adding resources to a resource pool, billing, and reporting
- B. Helps to consolidate all the IT resources in the cloud environment
- C. Enables the administrator to control the underlying physical infrastructure using a single unified management console
- D. Creates an automated set of tasks to update the service catalog by cloud consumers without requiring manual intervention

Correct Answer: C

---

### QUESTION 4

What can an IT department do to better meet IT challenges and support digital businesses?

- A. Become more technology centric
- B. Focus on delivery and management of digital assets
- C. Become more service centric within cost constraints
- D. Focus on providing services without being distracted by costs

Correct Answer: A

---

#### QUESTION 5

What is the function of a monitoring and alerting tool?

- A. Focus on examining the usage of resources by customers and service providers and provide notification to optimize and manage workloads
- B. Control charges for cloud usage by optimizing cloud resource utilization
- C. Automate tasks and IT processes and manage the IT environment
- D. Enable people to work closely together on a common project, in real time, by making communication among them easier

Correct Answer: A
