QUESTION 1

When installing an SC Series array, the customer indicated that they want the controller configured to provide the maximum amount of storage space. You discover that the storage controller was shipped with twelve 900 GB drives and twelve

1.8 TB drives of the same type.

Which redundancy level can be selected to provide the maximum amount of storage?

A. Put equal size drives in their own pagepool. Change the default redundancy level for the 1.8 TB drives.

B. Put all drives in the same tier. Keep the default redundancy level for both the 900 GB and 1.8 TB drives.

C. Put equal size drives in their own tier. Change the default redundancy level for the 900 GB drives.

D. Put equal size drives in their own pagepool. Keep the default redundancy level for both the 900 GB and 1.8 TB drives.

Correct Answer: C

QUESTION 2

What is a licensed feature of Dell Storage Manager?

A. Data Center Bridging (DCB) Support

B. Storage-based Chargeback

C. Replication and Live Volumes

D. Data Reduction

Correct Answer: B

Reference: https://www.dell.com/support/manuals/us/en/04/storage-sc2020/sc-7.2-rn/sc7020-and-sc5020-features-and-licenses?guid=guid-951cc6b4-5d6e-4b46-8c72-a7f69514dd08andlang=en-us

QUESTION 3

Why would the Key Management Server (KMS) Settings page appear during installation?

A. Page appears only if SED drives are present

B. Page only appears if an external KMS is defined during setup and configuration

C. Page is standard and always appears as part of the installation and configuration

D. Page only appears if a security certificate is not generated

Correct Answer: A

QUESTION 4

You recently added a second Storage Center to your network. Both systems were added to DSM, and you can ping the iSCSI ports of the remote system. You are planning to replicate between your two systems, but you cannot get the Replication Wizard to launch.

What item is missing?

A. Data Progression is not running on both systems

B. Deduplication is enabled on the source system

C. Both systems do not have a QoS setting enabled

D. Remote Instant Replay license has not been applied

Correct Answer: B

QUESTION 5

Which best practices should be followed when using iSCSI to connect SC Series arrays and hosts?

A. Use dedicated switches for iSCSI. Two separate VLANS for multipathed iSCSI using separate IP subnets. Gigabit full duplex between Storage Center and all local servers.

B. Use separate IP subnets for multipathed iSCSI separated by VLANS when using the same switch. Gigabit full duplex between Storage Center and all local servers

C. Use separate switches for iSCSI. Two separate VLANs for multipathed iSCSI using separate IP subnets. Unicast and multicast storm control enabled on all iSCSI switches.

D. Use separate VLANs for multipathed iSCSI using separate IP subnets when using the same switch. Bi-directional flow control disabled between Storage Center and servers.

Correct Answer: D
