QUESTION 1

An organization uses Microsoft Active Directory (AD) for service authentication in their private cloud. They want to use the same authentication source for services in the public cloud. External employees access services in both clouds and need to authenticate with AD. The organization wants to minimize and secure network traffic. Which solution will address these requirements?

- A. Connect the two clouds through IPsec VPNPlace AD controllers in the private cloud only
- B. Connect the two clouds through IPsec VPNPlace AD controllers in the private and public clouds
- C. Configure perimeter firewalls to allow AD trafficPlace AD controllers in the private and public clouds
- D. External users connect with IPsec VPNPlace AD controllers in the private cloud only

Correct Answer: B

QUESTION 2

Which benefits might be realized by designing a separate infrastructure pool to host network functions?

- A. Reduced public IP address consumption, reduced troubleshooting time, and reduced consumer infrastructure load
- B. Reduced troubleshooting time, reduced consumer infrastructure load, and enhanced security
- C. Reduced troubleshooting time, enhanced security, and reduced public IP address consumption
- D. Reduced consumer infrastructure load, enhanced security, and reduced public IP address consumption

Correct Answer: D

QUESTION 3

A cloud design includes a software-defined network controller. Which requirement(s) will this address?

- A. Elastically expand applications programmatically into the public cloud
- B. Deploy applications that can programmatically modify zones and deploy LUNs in a SAN
- C. Programmatically abstract network data for optimal performance in a low bandwidth infrastructure
- D. Deploy applications that can programmatically alter network behavior.

Correct Answer: C

QUESTION 4

An organization wants to protect the cloud management platform (CMP) from loss due to a site disaster. To support this requirement, the completed cloud design deliverables include the processes and procedures for restoring CMP functionality.

What other item should be included in the deliverables to support this requirement?

- A. Recovery validation and verification processes
- B. Data abstraction keys
- C. List of all consumer service IP addresses
- D. Document containing the data encryption keys

Correct Answer: A

QUESTION 5

What is a key benefit to consumers of cloud services?

- A. Start with minimal capital expenditure
- B. Dedicated SAN access to applications
- C. Requires extensive IT skills
- D. No operational expenditure

Correct Answer: A
