### **QUESTION 1**

What is a key benefit to consumers of cloud services?

- A. Start with minimal capital expenditure
- B. Dedicated SAN access to applications
- C. Requires extensive IT skills
- D. No operational expenditure

Correct Answer: A

#### **QUESTION 2**

#### **DRAG DROP**

A cloud architect is delivering a knowledge transfer on how to script a service in the Service Catalog that restores a VM. What is the correct order of steps that should be demonstrated?

#### Select and Place:

Signal the Backup Server to restore the VM	STEP 1
Select an existing backup of the VM to restore	STEP 2
Power on the restored VM	STEP 3
Delete the VM using the hypervisor	STEP 4
Shut down the VM using the hypervisor	STEP5

Correct Answer:

## https://www.geekcert.com/des-2t13.html 2024 Latest geekcert DES-2T13 PDF and VCE dumps Download

Shut down the VM using the hypervisor
Delete the VM using the hypervisor
Select an existing backup of the VM to restore
Signal the Backup Server to restore the VM
Power on the restored VM

#### **QUESTION 3**

#### SPECIAL INSTRUCTIONS REMINDER

The remaining questions are associated with two cases. Each case has an introductory, descriptive passage (case text) that describes background information and requirements for a specific cloud based design. And each case has a set of

six related, randomized questions. You will need to read the case text in order to answer the related questions correctly.

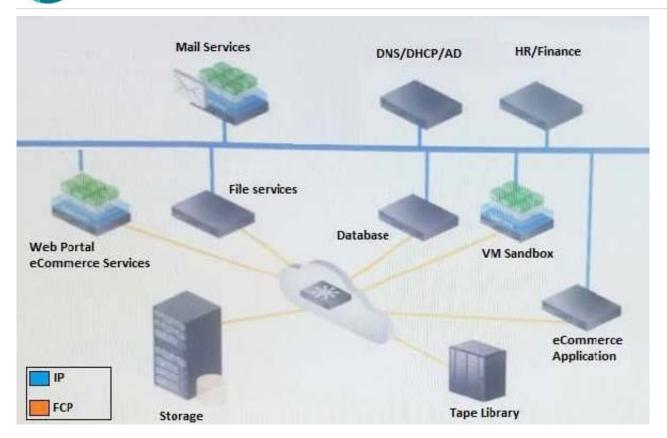

Given that there are two cases with six scored questions each, the total number of case-based scored questions is 12.

When you display each questions you can easily review the related case text in a pop-up window by clicking on the "Case" icon (shown below)

Case 4

Refer to the exhibit.

Your company is currently using a traditional SAN storage network. The server infrastructure is partially virtualized. There is a public cloud in place that is used to test development and application migration to cloud.

#### Business requirements:

Consolidate the network, storage, and compute resources Simplify network management and storage provisioning Maintain application performance

Need to share resources to reduce cost and improve efficiency Other considerations:

Monitoring of protection SLAs

All transactions must be logged for auditing review

Users are validated using internal credentials

Refer to Case 4.

You are sizing the compute capacity nodes in a hyper-converged infrastructure solution. Each node has 35 TB of storage capacity. You have calculated the total cloud storage requirement to be 700 TB.

What is the minimum number of nodes required?

- A. 10
- B. 14
- C. 15
- D. 20

Correct Answer: D

#### **QUESTION 4**

You plan to gather application performance data from an existing UNIX environment. What should you use?

A. esxtop

B. NaviAnalyzer

C. iostat

D. perfmon

Correct Answer: D

#### **QUESTION 5**

An organization uses Microsoft Active Directory (AD) for service authentication in their private cloud. They want to use the same authentication source for services in the public cloud. External employees access services in both clouds and need to authenticate with AD. The organization wants to minimize and secure network traffic. Which solution will address these requirements?

- A. Connect the two clouds through IPsec VPNPlace AD controllers in the private cloud only
- B. Connect the two clouds through IPsec VPNPlace AD controllers in the private and public clouds
- C. Configure perimeter firewalls to allow AD trafficPlace AD controllers in the private and public clouds
- D. External users connect with IPsec VPNPlace AD controllers in the private cloud only

Correct Answer: B
