### QUESTION 1

What is the benefit of Hot Spare disks?

- A. Enable efficient use of SSDs and NL SAS drive technologies
- B. Provide space-optimal data redundancy against multiple drive failures
- C. Handle any disk failure by distributing data over multiple drives
- D. Replace failed drives by taking the identity of the failed drive

Correct Answer: D

---

### QUESTION 2

What is a deliverable of the cloud design process?

- A. Training for IT staff
- B. Operational procedures
- C. Lower infrastructure costs
- D. Reduced time to market

Correct Answer: C

---

### QUESTION 3

A company has the following requirements:

Infrastructure with a designated SAN

Run applications on pre-integrated hardware components Workloads are Platform 2.0 applications

Which solution would meet these requirements?

- A. Traditional Infrastructure
- B. Cloud-in-a-Box Infrastructure
- C. Converged Infrastructure
- D. Hyper-Converged Infrastructure

Correct Answer: D

---

#### QUESTION 4

An organization wants to have showback capability in their private cloud. Which cloud management platform component should be included in the cloud design to support this requirement?

- A. SSO
- B. Service catalog
- C. Metering application
- D. Monitoring application

Correct Answer: C

Note: IT chargeback is an accounting strategy that applies the costs of IT hardware, software, cloud services or shared services to the business unit in which they are used. IT showback is similar to IT chargeback, but the prices are for informational purposes only and no one is billed.

#### QUESTION 5

You are a cloud architect responsible for designing a multiple availability zone configuration for the organization's geographically dispersed clouds. You must provide the ability for services to survive a failure at the data center or site level. The

primary requirement is to provide for automated site recovery.

What is a key consideration for automating the setup, failover, and recovery of services at the remote site?

- A. When implementing automated site recovery, you must have automated orchestration of site failback processes
- B. The number of storage volumes in the DR site must be identical in number and size to the primary site.
- C. The recovery site must have sufficient available capacity to host workloads after a disaster at the primary site.
- D. The DR site must contain the same vendor hardware as the primary site.

Correct Answer: C
