QUESTION 1

Which Dell EMC Data Protection Suite for Applications technology enables the Hypervisor Direct backup to Data Domain?

A. ProtectPoint and vRPA

B. vRPA and VMware ESXi

C. ProtectPoint and Client Direct

D. VMware ESX and Avamar

Correct Answer: B

QUESTION 2

A company\\'s environment consists of two Dell EMC Unity arrays and two XtremIO arrays connected to a VPLEX Local. They have a requirement that will provide synchronous local protection for several key applications.

How many RecoverPoint clusters and which license type are required to meet this requirement?

A. One cluster with one RecoverPoint/EX license

B. One cluster with four RecoverPoint/EX licenses

C. One cluster with five RecoverPoint/EX licenses

D. Two clusters with one RecoverPoint/SE license each

Correct Answer: D

QUESTION 3

A company is planning to implement a Dell EMC RecoverPoint solution for the first time. They currently have two data centers and require remote replication. You have analyzed the WAN link between the two data centers and determined it will meet all their requirements.

What other factor will impact first time initialization of all newly configured Consistency Groups?

A. Journal performance for Production

B. RPO setting for each Consistency Group

C. Size of the volumes being replicated

D. Journal performance for remote copies

Correct Answer: C

QUESTION 4

A customer wants to perform a data center refresh. They want to standardize their backup infrastructure by using Dell EMC NetWorker and Data Domain in an integrated environment. The environment consists of:

A primary data center with NetWorker and Data Domain A disaster recovery (DR) data center with only Data Domain

All data is backed up to NetWorker using a DD Boost device. The data is then copied to the DR data center. Data for several critical systems needs to be retained for seven years on tape at the DR data center. In order to configure and track backup jobs, the entire solution must be managed from a single unified interface.

Which application interface should be used?

A. NetWorker Management Console

B. Data Domain Management Center

C. Data Protection Advisor

D. Backup and Recovery Manager

Correct Answer: A

QUESTION 5

A customer wants a technology refresh of their Dell EMC NetWorker environment. They want the ability to backup to disk devices. In addition, they want to write all backup-to-disk devices with eight savesets simultaneously. After reviewing the current environment, you discover that only two drives are used.

Which setting should be changed so that all drives are used simultaneously?

A. Max sessions

B. Device parallelism

C. Target sessions

D. Client parallelism

Correct Answer: A
