QUESTION 5

DRAG DROP

What is the order of steps to configure DD Boost on the backup host?

Select and Place:

Configure backup policies and groups to use the PowerProtect DD appliance	STEP 1
License the backup software if required	STEP 2
Create devices and pools	STEP 3
Configure clone or duplicate operations to use managed file replication	STEP 4

Correct Answer:

	License the backup software if required
	Create devices and pools
	Configure backup policies and groups to use the PowerProtect DD appliance
	Configure clone or duplicate operations to use managed file replication

For the backup host:

1.

 License the backup software for DD Boost as required by the software manufacturer.

2.

 Create devices and pools through the management console/interface.

3.

 Configure backup policies and groups to use the Data Domain system for backups with DD Boost.

4.

 Configure clone or duplicate operations to use Data Domain managed replication between Data Domain systems.
