QUESTION 1

HOTSPOT

Select the answer that correctly completes the sentence.

Hot Area:

In a data warehousing workload, data

from multiple sources is combined in a single location.

Correct Answer:

In a data warehousing workload, data

from multiple sources is combined in a single location.

QUESTION 2

What are two uses of data visualization? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Represent trends and patterns over time.
- B. Communicate the significance of data.
- C. Implement machine learning to predict future values.
- D. Consistently implement business logic across reports

Correct Answer: AB

Data visualization is a key component in being able to gain insight into your data. It helps make big and small data easier for humans to understand. It also makes it easier to detect patterns, trends, and outliers in groups of data. Data visualization brings data to help you find key business insights quickly and effectively.

QUESTION 3

What should you use to automatically delete blobs from Azure Blob Storage?

- A. soft delete
- B. archive storage
- C. the change feed
- D. a lifecycle management policy

Correct Answer: D

QUESTION 4

You need to recommend a data store service that meets the following requirements:

1.

Native SQL API access

2.

Configurable indexes What should you recommend?

- A. Azure Files
- B. Azure Cosmos DB
- C. Azure Blob storage
- D. Azure Table storage

Correct Answer: B

Azure Cosmos DB comes with native Core (SQL) API support.

In Azure Cosmos DB, data is indexed following indexing policies that are defined for each container. The default indexing policy for newly created containers enforces range indexes for any string or number. This policy can be overridden with your own custom indexing policy.

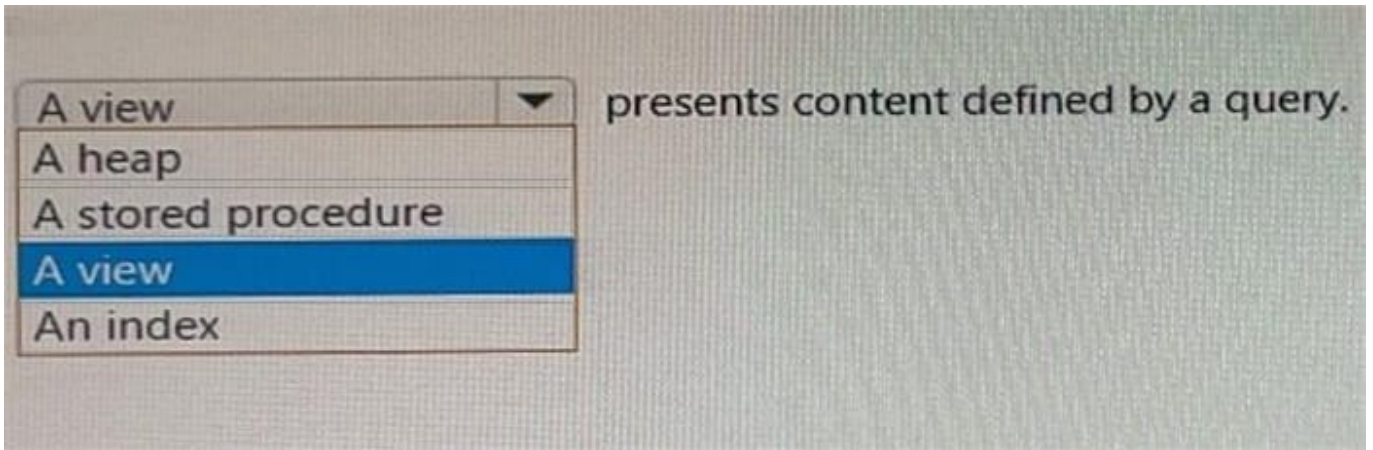

Reference: <https://docs.microsoft.com/en-us/azure/cosmos-db/sql/how-to-manage-indexing-policy>

QUESTION 5

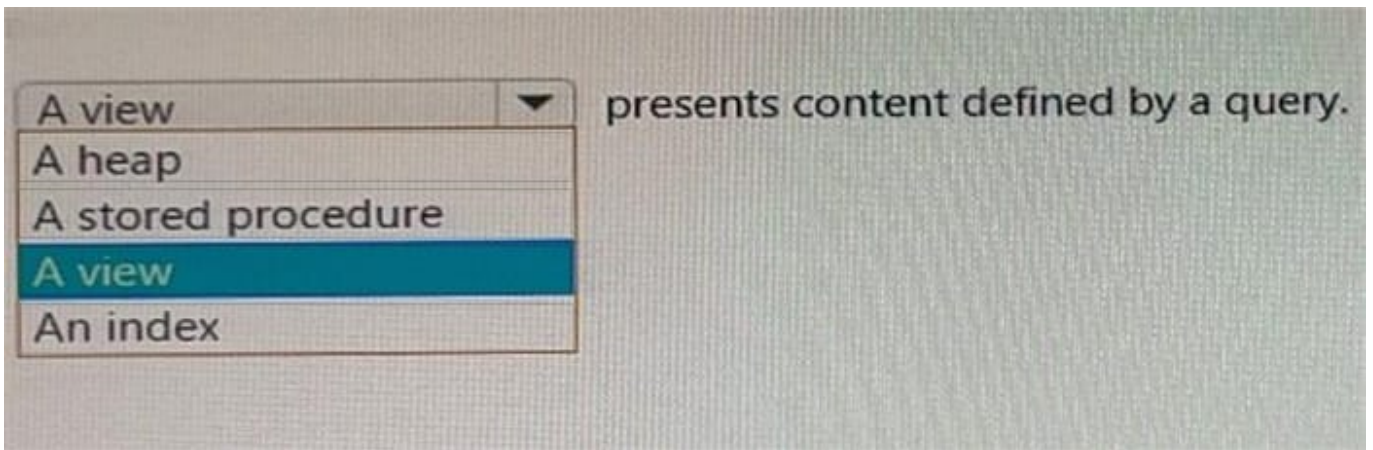

HOTSPOT

Select the answer that correctly completes the sentence.

Hot Area:

Correct Answer:
