QUESTION 1

A cloud design contains multiple hosts that are running a hypervisor. Each host has only two physical 10 Gb network adapters. The hosts reside in different subnets but can communicate with each other. Each host will support numerous virtual machines and network segments.

What is needed to support a network segmentation in the current configuration?

- A. IDS
- B. NVGRE
- C. MLAG
- D. VLAN

Correct Answer: B

QUESTION 2

An organization wants to deploy SaaS applications in their cloud. The SaaS applications will be using application HA to maintain up-time levels of 99.9%.

What should the cloud architect include in the design to support this up-time requirement?

- A. Sufficient host capacity
- B. Quorum disks
- C. Replication licenses for hypervisors
- D. HA licenses for hypervisors

Correct Answer: D

QUESTION 3

An organization wants to deploy applications that can programmatically alter network behavior. In addition, they want to deploy additional network services in real-time.

Which cloud-management component should be included in the design to support this requirement?

- A. Hypervisor Element Manager
- B. Software-Defined Network Controller
- C. Network Management Controller
- D. Virtual Switch Manager

Correct Answer: B

**QUESTION 4**

An organization wants to provide backup services in the cloud. They have no backup infrastructure in place. The organization has concerns about losing data if a site disaster occurs. They want to maintain control of backup data placement because of data privacy laws. Finally, they want to maintain at least one month's worth of backups onsite.

Which backup solution will meet these requirements?

- A. Local backup
- B. Remote backups
- C. Local backup with replication
- D. Local backups with cloud gateway

Correct Answer: D

QUESTION 5

What is a benefit of a service catalog?

- A. Handles every IT request simultaneously
- B. Allows users to customize tenant roles
- C. Services do not have to meet the standards set by the business
- D. Enables the application of quotas on resources to control cost

Correct Answer: D
