### QUESTION 1

In which cloud services are policy compliance typically defined in a hybrid cloud deployment?

- A. Portal, catalog, and orchestration
- B. Virtual networking, portal, and catalog
- C. Orchestration, virtual networking, and portal
- D. Catalog, orchestration, and virtual networking

Correct Answer: D

---

### QUESTION 2

A cloud design contains multiple hosts that are running a hypervisor. Each host has only two physical 10 Gb network adapters. The hosts reside in different subnets but can communicate with each other. Each host will support numerous virtual machines and network segments.

What is needed to support a network segmentation in the current configuration?

- A. IDS
- B. NVGRE
- C. MLAG
- D. VLAN

Correct Answer: B

---

### QUESTION 3

An architect is designing a cloud. The architect has decided to place the cloud management platform components on a separate set of compute, network, and storage infrastructure from the consumer resources. Why would the architect make this decision?

- A. Provide static and dedicated resources to the management applications without affecting the efficiency of consumer resource sharing
- B. Provide static and dedicated resources to the consumer applications without affecting the efficiency of the management applications
- C. Provide additional security to the management infrastructure by eliminating exposure to public-facing networks
- D. Provide separate billing for the management applications for the consumer's resources

Correct Answer: C

---

#### QUESTION 4

An organization wants to deploy applications that can programmatically alter network behavior. In addition, they want to deploy additional network services in real-time.

Which cloud-management component should be included in the design to support this requirement?

- A. Hypervisor Element Manager
- B. Software-Defined Network Controller
- C. Network Management Controller
- D. Virtual Switch Manager

Correct Answer: B

---

#### QUESTION 5

What describes the storage categories represented by OpenStack Swift and EMC XtremIO requirements?

- A. Swift = Distributed Object StorageXtremIO = Central Storage
- B. Swift = Central Storage XtremIO = Distributed File Storage
- C. Swift = Distributed Block StorageXtremIO = Distributed Object Storage
- D. Swift = Distributed File StorageXtremIO = Distributed Block Storage

Correct Answer: A
