### QUESTION 1

What is a benefit of a service catalog?

- A. Handles every IT request simultaneously
- B. Allows users to customize tenant roles
- C. Services do not have to meet the standards set by the business
- D. Enables the application of quotas on resources to control cost

Correct Answer: D

---

### QUESTION 2

You are creating a cloud infrastructure design for an organization. The cloud design includes physical servers with hypervisors which will be used to host consumer services. The hosts are managed through a hypervisor element manager.

Which step should be taken to secure the hypervisor environment?

- A. Place the element manager administrative interfaces on a consumer-facing network and hypervisor administrative interfaces on an isolated network
- B. Place the element manager administrative interfaces on a consumer-facing network and hypervisor administrative interfaces on a secure network
- C. Place the element manager and hypervisor administrative interfaces on a secure network
- D. Place the element manager and hypervisor administrative interfaces on a consumer-facing network

Correct Answer: C

---

### QUESTION 3

A cloud architect has determined that the cloud management infrastructure requires an authentication and PKI environment. In addition, each tenant will require its own authentication and PKI environment. What describes these separate environments in a cloud design document?

- A. Availability zones
- B. Fault domains
- C. Multi-tenancy
- D. Trust zones

Correct Answer: C

---

#### QUESTION 4

Which benefits might be realized by designing a separate infrastructure pool to host network functions?

- A. Reduced public IP address consumption, reduced troubleshooting time, and reduced consumer infrastructure load
- B. Reduced troubleshooting time, reduced consumer infrastructure load, and enhanced security
- C. Reduced troubleshooting time, enhanced security, and reduced public IP address consumption
- D. Reduced consumer infrastructure load, enhanced security, and reduced public IP address consumption

Correct Answer: D

---

#### QUESTION 5

In a cloud design, an architect has defined a separate trust zone for host management. The hosts will be running open source hypervisors.

What should be included in the design deliverables to support this separate trust zone?

- A. Isolated management network and a common super-user account
- B. Separate PKI and encrypted CMI portal access
- C. Separate authentication source and a preferred zone set
- D. Isolated management network and a separate authentication source

Correct Answer: D
