QUESTION 1

An administrator wants to migrate an FLR-enabled file system with DHSM-enabled from a Dell EMC VNX array to a new Dell EMC Unity XT array. What method should they use?

A. IP Replicator to replicate the file system

B. Dell EMC Unity File Import feature

C. IP Replicator V2 to replicate the file system

D. CTA with Unity XT FLR-enabled FS as a tiering destination

Correct Answer: B

FLR is supported when using Native File Import to migrate fromVNX to Unity.

If the source file system is FLR-enabled, the destination is provisioned with the same FLR settings

No ability to reconfigure FLR settings during importRetention periods and lock status are migrated.

If an FLR file system is being imported, DHSM must be configured on the VNX

QUESTION 5

What is a benefit of Dell EMC Unity XT Series dynamic pools?

A. Reduced time to rebuild a failed drive

B. Improved access to data resident on the drive tiers

C. Protects written data from deletion or modification

D. Enables throughput and bandwidth throttling

Correct Answer: A

A pool type introduced in Dell EMC Unity OE version 4.2toprovide space to storage resources. Dynamic pools allow for flexible deployment models, and reduced rebuild times and flash wear compared to Traditional pools. A dynamic pool is created when creating a pool in Unisphere in Dell EMC Unity OE version 4.2 and later. Dynamic pools are only supported on Dell EMC Unity all-flash systems.
