-  **800,000+** Satisfied Customers

#### QUESTION 1

When creating an SMB share on the Isilon cluster, what is the effect of selecting the "Apply Windows Default ACLs"?

- A. An ACL with the equivalent of UNIX 700 mode bit permissions is created for any directory automatically created
- B. File permissions are automatically set to be the same as the share permissions
- C. Share permissions configuration is no longer required as it too will be set to the default values
- D. Ownership of all files in the directory will be set to the default user's SID

Correct Answer: A

---

#### QUESTION 2

What effect does enabling GNA on an Isilon node pool have for SSDs?

- A. Allows node pools without SSDs to use SSDs in other node pools for metadata read acceleration
- B. Allows SSDs in the same node pool as the data to be used for metadata read acceleration
- C. Allows SSDs in all node pools to be used as L3 cache and shared between node pools
- D. Enables cluster-wide read/write metadata acceleration utilizing all SSDs

Correct Answer: A

---

#### QUESTION 3

What is the result of mapping POSIX mode bits to a Microsoft Windows ACL on an Isilon cluster?

- A. No ownership information is lost
- B. Process creates a real ACL
- C. Security of the file may be increased
- D. Multiple user ACEs are collapsed into a single ACE

Correct Answer: A

---

#### QUESTION 4

When using the same Active Directory domain for multiple access zones on an Isilon cluster, which configuration must be considered?

- A. Each individual access zone must be configured with the Active Directory domain

- B. All configured access zones will use the system zone's configured Active Directory domain
- C. Each access zone requires a unique Active Directory domain
- D. Each access zone must be configured using the same SmartConnect zone and pool

Correct Answer: A

---

#### QUESTION 5

What are the benefits of Isilon Scale-Out NAS versus Scale-Up NAS technology?

- A. File-based storage, File system upper limit 20 PB+, quick scalability, and more granular file protection
- B. Block-based storage, file system upper limit 10 PB, nodes contain all components, and RAID protection
- C. Block-based storage, file system upper limit 20 PB+, nodes contain all components, and more granular file protection
- D. File-based storage, file system upper limit 16 TB, quick scalability, and volume level RAID protection

Correct Answer: A
