QUESTION 1

An Isilon storage administrator has created a 500 GB quota on a new directory called ``/ifs/homedirs\``. The administrator then begins migrating files from a Linux server through NFS to the new directory.

The migration tool returns a "Disk quota exceeded" error and fails to complete after approximately 400 GB of files are copied to the Isilon cluster. However, the cluster is reporting 10 TB of unused capacity.

What is the most likely cause for this error?

- A. Hard quota includes overhead
- B. SmartPool tier capacity has been exceeded
- C. Soft quotas have been exceeded
- D. Only the root can exceed 80% of quota

Correct Answer: A

QUESTION 2

Which protocol is used for communication between an Isilon InsightIQ virtual appliance and external storage for monitoring data?

- A. NFS
- B. HDFS
- C. HTTP
- D. SMB

Correct Answer: A

QUESTION 3

Which Isilon cluster quota events can be triggered for an advisory quota?

- A. Limit exceeded and limit remains exceeded
- B. Grace period expired and write access denied
- C. Limit remains exceeded and write access denied
- D. Grace period expired and write access denied

Correct Answer: A

QUESTION 4

Which mechanisms can provide real time notification of Isilon events?

- A. ESRS, SNMP traps, and SMTP
- B. SupportIQ, isi statistics, and SNMP polling
- C. isi_gather_info, SNMP set, and SupportIQ
- D. SNMP traps, SNMP set, and SNMP polling

Correct Answer: A

QUESTION 5

A storage administrator has configured two SmartConnect zones on an Isilon cluster labeled ZoneA and ZoneB. Source-Based Routing has been enabled on the cluster.

How will the outgoing network packets from the cluster be routed back to the requesting IP?

- A. Both zones will use the source IP to route the packets
- B. Both zones will use the highest priority default gateway
- C. ZoneB will route all packets through ZoneA
- D. ZoneA will route all packets through ZoneB

Correct Answer: A
