QUESTION 1

In the evolution of converged infrastructure, what are Appliances?

- A. Factory fabricated systems that offer a complete cloud with multiple personas on top of common hardware
- B. Multi-persona factory fabricated systems with integrated cloud deployment models that are able to scale storage and compute independently
- C. Engineered systems designed to deliver discreet components in a predictable manner with a single personality
- D. Single-personality infrastructure for customers that lack the expertise in-house to deploy and manage Converged Systems

Correct Answer: A

QUESTION 2

You are responsible for building Service Level Agreements (SLAs) for your company. When building them for the service lifecycle of a cloud application, what should you consider?

- A. SLA updates may be needed due to the availability of new markets
- B. New SLAs should be created with the release of scheduled enhancements
- C. SLAs should incorporate all necessary requirements when they are created
- D. SLAs are contractual and cannot be changed without customer consent

Correct Answer: B

QUESTION 3

The principles of Autonomy, Abstraction, Discoverability, Composability, and Reusability are all principles of what?

- A. Application profiling
- B. Service inventory
- C. Delivery models
- D. Service characteristics

Correct Answer: B

QUESTION 4

An organization wants to use a public cloud provider for IaaS instances. They will develop and deploy their own applications within these instances. The organization must follow health care compliance regulations.

What should the organization ensure before deploying their applications in the public cloud?

- A. Instances will not be placed in more than one availability zone
- B. Auditors have access to the cloud provider's data encryption keys
- C. Cloud provider supplies data-in-transit encryption capabilities
- D. Cloud provider supplies proper controls and audits for compliance requirements

Correct Answer: C

QUESTION 5

An IT department wants to reduce waste by shutting down and archiving auto-scaling groups (ASGs) and VMs that have been inactive for more than two weeks. Archived ASGs and VMs will consume tenant quota for the responsible parties. The IT department wants email notifications to be sent to the tenant and the line of business controller automatically when this happens.

How might you define the configuration for such a solution?

- A. Monitoring triggers for low activity Orchestration activities for inactivity backup Backup target as tenant's object store
Monitoring alerts for inactivity backup
- B. Metering triggers for low activity Orchestration activities for inactivity backup Backup target as tenant's object store
Metering alerts for inactivity backup
- C. Metering triggers for low activity Catalog activities for inactivity backup Backup target as tenant's object store
Metering alerts for inactivity backup
- D. Monitoring triggers for low activity Catalog activities for inactivity backup Backup target as tenant's object store
Monitoring alerts for inactivity backup

Correct Answer: C
