QUESTION 1

Which recent software innovations are applied in SAP HANA? 3 answers

- A. Columnar data storage
- B. Automated de-installation at system shutdown
- C. Improved data compression algorithms
- D. Insert Only approach
- E. Random Undefined Multi-Memory Swapping (RUMMS)

Correct Answer: ACD

QUESTION 2

You analyse SQL Monitor data in transaction SQLMD. You know that program X accesses database table

Y. You made sure that program X was executed while the SQL Monitor collected its data. But the relevant database access is NOT listed in SQLMD.

What could be the reason?

Note: There are 3 correct answers to this question.

- A. SQL Monitor was activated for a specific application server
- B. SQL monitor was activated with a filter that excludes database table Y
- C. The data has NOT yet been transferred to the SQL monitor database tables
- D. Program X was executed in the background.
- E. Database table Y is a buffered table.

Correct Answer: ABC

QUESTION 3

What is the main benefit of the SQL Performance Tuning Worklist?

- A. It establishes a governance process for performance optimizations.
- B. It automatically translates ABAP coding to SQLScript.
- C. It allows you to correlate the results of an ABAP source code analysis with SQL runtime data.
- D. It allows you to simulate the impact of performance optimization patterns.

Correct Answer: C

QUESTION 4

What should you do to follow the code-to-data approach to programming? 2 answers

- A. Perform expensive calculations on the database
- B. Transfer all data from the database to the ABAP layer, and then aggregate the results.
- C. Perform expensive calculations on the ABAP application server.
- D. Aggregate data on the database, and transfer the results to the ABAP layer.

Correct Answer: AD

QUESTION 5

In ADT which setting below to a specific project rather than the entire workbench. Choose the correct answer

- A. Code completion option
- B. Statement Template options
- C. Editor shortcut options
- D. Code formatting option

Correct Answer: D
