QUESTION 1

Is SAP Data Hub yet another ETL or streaming tool?

A. Yes, SAP Data Hub is the new SAP ETL offering in combination with Kubernetes.

B. Yes, SAP Data Hub is the new tool for ETL processes for Hadoop Cluster and public cloud storages.

C. No, SAP Data Hub goes beyond classical batch ETL or real-time streaming.

D. Yes, SAP Data Hub is the new integrated toolset for ETL or real-time streaming.

Correct Answer: C

QUESTION 2

What are the characteristics of a data warehouse? Note: There are 2 correctanswers to this question.

A. It typically contains massive amounts of "raw" and unstructured/non-relational data.

B. It is mainly built for "new" data types like sensor, web, and social media data.

C. It has an active archive for historical data. It contains standardized data models and harmonized D data.

D. It contains predominantly structured data from enterprise systems.

Correct Answer: CD

QUESTION 3

What key functionality does SAP Data Hub include? Note: There are 2 correct answers to this question.

A. Orchestration of complex processes and workflows across system boundaries.

B. New ETL tools for building a data warehouse solution

C. Data pipelines across data lakes.

D. State-of-the-art deep learning algorithms for data scientists.

Correct Answer: AC

QUESTION 4

Is it possible to extend SAP HANA EIM with custom adapters?

A. Yes, SAP HANA smart data integration offers an adapter API.

B. No, this is not necessary because all existing sources can already be accessed via SAP HANA EIM.

C. No, custom code is a potential security risk and therefore not allowed.

D. Yes, you can use enhancement spots via the ODP framework to extend SAP ERP extractors.

Correct Answer: A

QUESTION 5

The goal of implementing SAP Business Warehouse is to move the reporting burden from the ERP system? Determine whether this statement is true or false.

A. True

B. False

Correct Answer: A
